

# Technical Information

## Proline Promass Q 300

Coriolis flowmeter

Innovative specialist for challenging applications with a compact, easily accessible transmitter

### Application

- Measuring principle operates independently of physical fluid properties such as viscosity or density
- Highest measurement performance for custody transfer, density and under tough process conditions

### Device properties

- Mass/volume flow: measurement error  $\pm 0.05\%$
- Density: measurement error  $\pm 0.1 \text{ kg/m}^3$
- High turndown due to low pressure loss/zero point
- Compact dual-compartment housing with up to 3 I/Os
- Backlit display with touch control and WLAN access
- Remote display available

### Your benefits

- Secured measuring quality – unmatched accuracy of mass flow, volume flow and density
- Optimized performance for liquids with entrained gas – MFT (Multi-Frequency Technology)
- Fewer process measuring points – multivariable measurement (flow, density, temperature)
- Space-saving installation – no in-/outlet run needs
- Full access to process and diagnostic information – numerous, freely combinable I/Os and Ethernet
- Reduced complexity and variety – freely configurable I/O functionality
- Integrated verification – Heartbeat Technology

## About this document

### Symbols

#### Electrical symbols

Symbol	Meaning
	Direct current
	Alternating current
	Direct current and alternating current
	<b>Ground connection</b> A grounded terminal which, as far as the operator is concerned, is grounded via a grounding system.
	<b>Protective earth (PE)</b> Ground terminals that must be connected to ground prior to establishing any other connections.  The ground terminals are located on the interior and exterior of the device: <ul style="list-style-type: none"> <li>▪ Interior ground terminal: protective earth is connected to the mains supply.</li> <li>▪ Exterior ground terminal: device is connected to the plant grounding system.</li> </ul>

#### Communication-specific symbols

Symbol	Meaning
	<b>Wireless Local Area Network (WLAN)</b> Communication via a wireless, local area network
	<b>LED</b> LED is off.
	<b>LED</b> LED is on.
	<b>LED</b> LED flashing.

#### Symbols for certain types of information

Symbol	Meaning
	<b>Permitted</b> Procedures, processes or actions that are permitted.
	<b>Preferred</b> Procedures, processes or actions that are preferred.
	<b>Forbidden</b> Procedures, processes or actions that are forbidden.
	<b>Tip</b> Indicates additional information.
	Reference to documentation
	Reference to page
	Reference to graphic
	Visual inspection

**Symbols in graphics**

Symbol	Meaning
1, 2, 3, ...	Item numbers
1, 2, 3, ...	Series of steps
A, B, C, ...	Views
A-A, B-B, C-C, ...	Sections
	Hazardous area
	Safe area (non-hazardous area)
	Flow direction

**Function and system design**

**Measuring principle**

The measuring principle is based on the controlled generation of Coriolis forces. These forces are always present in a system when both translational and rotational movements are superimposed.

$$F_c = 2 \cdot \Delta m (v \cdot \omega)$$

$F_c$  = Coriolis force

$\Delta m$  = moving mass

$\omega$  = rotational velocity

$v$  = radial velocity in rotating or oscillating system

The amplitude of the Coriolis force depends on the moving mass  $\Delta m$ , its velocity  $v$  in the system and thus on the mass flow. Instead of a constant rotational velocity  $\omega$ , the sensor uses oscillation.

In the sensor, two parallel measuring tubes containing flowing medium oscillate in antiphase, acting like a vibrating fork. The Coriolis forces produced at the measuring tubes cause a phase shift in the tube oscillations (see illustration):

- At zero flow (when the medium is at a standstill) the two tubes oscillate in phase (1).
- Mass flow causes deceleration of the oscillation at the inlet of the tubes (2) and acceleration at the outlet (3).

A0028850

The phase shift (A-B) increases with increasing mass flow. Electrodynamic sensors register the tube oscillations at the inlet and outlet. System balance is ensured by the antiphase oscillation of the two measuring tubes. The measuring principle operates independently of temperature, pressure, viscosity, conductivity and flow profile.

**Density measurement**

The measuring tube is continuously excited at its resonance frequency. A change in the mass and thus the density of the oscillating system (comprising measuring tube and medium) results in a corresponding, automatic adjustment in the oscillation frequency. The resonance frequency is thus a function of the medium density. The microprocessor utilizes this relationship to obtain a density signal.

**Volume measurement**

Together with the measured mass flow, this is used to calculate the volume flow.

**Temperature measurement**

The temperature of the measuring tube is determined in order to calculate the compensation factor due to temperature effects. This signal corresponds to the process temperature and is also available as an output signal.

**Multi-frequency technology (MFT)**

Highly accurate measurement of two-phase flow (gaseous medium with suspended bubbles or micro bubbles) using active compensation. Here, the two measuring tubes are excited simultaneously at different resonance frequencies. By analyzing the resonance characteristics of both oscillations in relation to the medium, measurement errors can be actively compensated.

**Gas Fraction Handler (GFH)**

The Gas Fraction Handler is a Promass software function that improves measurement stability and repeatability. The function continuously checks for the presence of disturbances in single-phase flow, i.e. gas bubbles in liquids. In the presence of the second phase, flow and density become increasingly unstable. The Gas Fraction Handler function improves measurement stability with respect to the severity of the disturbances, without any effect under single-phase flow conditions.

The Gas Fraction Handler is only available for device versions with HART, Modbus RS485, PROFINET, PROFINET over Ethernet-APL and Modbus TCP over Ethernet-APL.

For more detailed information on the Gas Fraction Handler, see the "Gas Fraction Handler" Special Documentation → 119

**Measuring system**

The device consists of a transmitter and a sensor.

The device is available as a compact version:

The transmitter and sensor form a mechanical unit.

**Transmitter**

<p><b>Proline 300</b></p>  <p>A0026708</p>	<p>Device versions and materials:</p> <ul style="list-style-type: none"> <li>▪ Transmitter housing <ul style="list-style-type: none"> <li>▪ Aluminum, coated: aluminum, AlSi10Mg, coated</li> <li>▪ Stainless, hygienic: stainless steel, 1.4404</li> <li>▪ Cast, stainless: cast, stainless steel, 1.4409 (CF3M) similar to 316L</li> </ul> </li> <li>▪ Material of window in transmitter housing: <ul style="list-style-type: none"> <li>▪ Aluminum, coated: glass</li> <li>▪ Stainless, hygienic: polycarbonate</li> <li>▪ Cast, stainless: glass</li> </ul> </li> </ul> <p>Configuration:</p> <ul style="list-style-type: none"> <li>▪ External operation via 4-line, illuminated graphic local display (LCD) with touch control and guided menus ("Make-it-run" wizards) for application-specific commissioning.</li> <li>▪ Via service interface or WLAN interface: <ul style="list-style-type: none"> <li>▪ Operating tools (e.g. FieldCare, DeviceCare)</li> <li>▪ Web server (access via web browser)</li> </ul> </li> </ul>

**Equipment architecture**

A0027512

1 Possibilities for integrating measuring instruments into a system

- 1 Automation system (e.g. PLC)
- 2 Connection cable (0/4 to 20 mA HART etc.)
- 3 Fieldbus
- 4 Coupler
- 5 Non-hazardous area
- 6 Hazardous area: Zone 2; Class I, Division 2
- 7 Hazardous area: Zone 1; Class I, Division 1

**Reliability**

**IT security**

The manufacturer warranty is valid only if the product is installed and used as described in the Operating Instructions. The product is equipped with security mechanisms to protect it against any inadvertent changes to the settings.

IT security measures, which provide additional protection for the product and associated data transfer, must be implemented by the operators themselves in line with their security standards.

**Device-specific IT security**

The device offers a range of specific functions to support protective measures on the operator's side. These functions can be configured by the user and guarantee greater in-operation safety if used correctly. The following list provides an overview of the most important functions:

Function/interface	Factory setting	Recommendation
Write protection via hardware write protection switch → 8	Not enabled	On an individual basis following risk assessment
Access code (also applies to web server login or FieldCare connection) → 8	Not enabled (0000)	Assign a customized access code during commissioning

Function/interface	Factory setting	Recommendation
WLAN (order option in display module)	Enabled	On an individual basis following risk assessment
WLAN security mode	Enabled (WPA2-PSK)	Do not change
WLAN passphrase (Password) → 8	Serial number	Assign an individual WLAN passphrase during commissioning
WLAN mode	Access point	On an individual basis following risk assessment
Web server → 9	Enabled	On an individual basis following risk assessment
Service interface CDI-RJ45 → 9	Enabled	-

#### *Protecting access via hardware write protection*

Write access to the parameters of the device via the local display, web browser or operating tool (e.g. FieldCare, DeviceCare) can be disabled via a write protection switch (DIP switch on the main electronics module). When hardware write protection is enabled, only read access to the parameters is possible.

Hardware write protection is disabled when the device is delivered.

#### *Protecting access via a password*

Different passwords are available to protect write access to the device parameters or access to the device via the WLAN interface.

- **User-specific access code**  
Protect write access to the device parameters via the local display, web browser or operating tool (e.g. FieldCare, DeviceCare). Access authorization is clearly regulated through the use of a user-specific access code.
- **WLAN passphrase**  
The network key protects a connection between an operating unit (e.g. notebook or tablet) and the device via the WLAN interface which can be ordered as an option.
- **Infrastructure mode**  
When the device is operated in infrastructure mode, the WLAN passphrase corresponds to the WLAN passphrase configured on the operator side.

#### *User-specific access code*

Local display, web browser and operating tool (e.g. FieldCare, DeviceCare)

- Write access to the device parameters via the local display, web browser or operating tool (e.g. FieldCare, DeviceCare) can be protected by the modifiable, user-specific access code.
- When delivered, the device does not have an access code; the default value is 0000 (open).

#### *WLAN passphrase: Operation as WLAN access point*

A connection between an operating unit (e.g. notebook or tablet) and the device via the WLAN interface, which can be ordered as an optional extra, is protected by the network key. The WLAN authentication of the network key complies with the IEEE 802.11 standard.

When the device is delivered, the network key is pre-defined depending on the device. It can be changed via the **WLAN settings** submenu in the **WLAN passphrase** parameter.

#### *Infrastructure mode*

A connection between the device and WLAN access point is protected by means of an SSID and passphrase on the system side. Please contact the relevant system administrator for access.

#### *General notes on the use of passwords*

- The access code and network key supplied with the device should be changed during commissioning for security reasons.
- Follow the general rules for generating a secure password when defining and managing the access code or network key.
- The user is responsible for the management and careful handling of the access code and network key.

### Access via web server

The integrated web server can be used to operate and configure the device via a web browser. The connection is established via the service interface (CDI-RJ45) or WLAN interface. For device versions with the Ethernet/IP and PROFINET communication protocols, the connection can also be established via the terminal connection for signal transmission with Ethernet/IP, PROFINET (RJ45 plug), PROFINET over Ethernet-APL (two-wire) or Modbus TCP over Ethernet-APL.

The web server is enabled when the device is delivered. The web server can be disabled if necessary via the **Web server functionality** parameter (e.g., after commissioning).

The device and status information can be hidden on the login page. This prevents unauthorized access to the information.

For detailed information on device parameters, see: Description of Device Parameters.

### Access via OPC UA

The "OPC UA Server" application package is available in the device version with the HART communication protocol → 114.

The device can communicate with OPC UA clients using the "OPC UA Server" application package.

The OPC UA server integrated in the device can be accessed via the WLAN access point using the WLAN interface - which can be ordered as an optional extra - or the service interface (CDI-RJ45) via Ethernet network. Access rights and authorization as per separate configuration.

The following Security Modes are supported as per the OPC UA Specification (IEC 62541):

- Without
- Basic128Rsa15 – signed
- Basic128Rsa15 – signed and encrypted

### Access via service interface (port 2): CDI-RJ45

The device can be connected to a network via the service interface. Device-specific functions guarantee the secure operation of the device in a network.

The use of relevant industrial standards and guidelines that have been defined by national and international safety committees, such as IEC/ISA62443 or the IEEE, is recommended. This includes organizational security measures such as the assignment of access authorization as well as technical measures such as network segmentation.

PROFINET, Ethernet/IP:

The device can be integrated into a ring topology. The device is integrated via the terminal connection for signal transmission, output 1 (port 1) and the terminal connection to the service interface (port 2) → 102.

For detailed information on connecting transmitters with an Ex de approval, see separate document "Safety instructions" (XA) for the device.

### Advanced safety requirements

If the specified requirements for measures cannot be met, alternative measures may need to be put in place. This may involve, for example, mechanical protection of the product against tampering, the cabling, or organizational measures. The Proline measuring instruments can be used in the open field for example. Measures to combat physical tampering of the Proline measuring instruments must be arranged by the customer.

Additional analysis is required if Proline measuring instruments are integrated into a different system. Please note the following:

- The fieldbus network (OT) and company network (IT) must be strictly separated.
- Endress+Hauser recommends the segmentation of the fieldbus networks according to DIN IEC 62443-3-3.

### Network

Pay particular attention to the network components used, the router and switches for example. The operator must guarantee the integrity of the components. Access to the network must be restricted by the operator, if necessary.

### FDI Packages

Signed FDI Packages can be obtained via [www.endress.com](http://www.endress.com) for the configuration of the field device.

### User training

Depending on the application scenario, users who are not specialized in this area may come in contact with the instrument. We recommend that these users be trained in the safe use of the relevant terminals, components and/or interfaces and be made aware of security issues.

## Input

### Measured variable

#### Direct measured variables

- Mass flow
- Density
- Temperature

#### Calculated measured variables

- Volume flow
- Corrected volume flow
- Reference density

### Measuring range

#### Measuring range for liquids

DN Measuring instrument		DN Compatible pipe diameter		Measuring range full scale values $\dot{m}_{\min(F)}$ to $\dot{m}_{\max(F)}$	
[mm]	[in]	[mm]	[in]	[kg/h]	[lb/min]
25	1	25/40	1/1½	0 to 20 000	0 to 735
50	2	50/80	2/3	0 to 80 000	0 to 2 940
80	3	80/100	3/4	0 to 200 000	0 to 7 350
100	4	100/150	4/6	0 to 550 000	0 to 20 210
150	6	150/200	6/8	0 to 850 000	0 to 31 240
200	8	200/250	8/10	0 to 1 500 000	0 to 55 130
250	10	250/300	10/12	0 to 2 400 000	0 to 88 200

#### Measuring range for gases

The full scale value depends on the density and the speed of sound of the gas used. The full scale value can be calculated with the following formulas:

$$\dot{m}_{\max(G)} = (\rho_G \cdot (c_G/m) \cdot d_i^2 \cdot (\pi/4) \cdot 3600 \cdot n)$$

$\dot{m}_{\max(G)}$	Maximum full scale value for gas [kg/h]
$\rho_G$	Gas density in [kg/m³] at operating conditions
$c_G$	Speed of sound (gas) [m/s]
$d_i$	Measuring tube internal diameter [m]
$\pi$	Pi
$n = 2$	Number of measuring tubes for DN 25 to 100 (1 to 4 ")
$n = 4$	Number of measuring tubes for DN 150 to 250 (6 to 10 ")
$m = 2$	For all gases other than pure H2 and He gas
$m = 3$	For pure H2 and He gas

 To calculate the measuring range, use the *Applicator* sizing tool →  116

#### Recommended measuring range

 Flow limit →  67

### Operable flow range

Over 1000 : 1.

Flow rates above the preset full scale value do not override the electronics unit, with the result that the totalizer values are registered correctly.

## Input signal

### Output and input variants

→  13

### External measured values

 Various pressure and temperature measuring devices can be ordered from Endress+Hauser: see "Accessories" section →  117

It is recommended to read in external measured values to calculate the corrected volume flow.

#### *HART protocol*

The measured values are written from the automation system to the measuring device via the HART protocol. The pressure transmitter must support the following protocol-specific functions:

- HART protocol
- Burst mode

#### *Current input*

The measured values are written from the automation system to the measuring device via the current input →  12.

#### *Digital communication*

The measured values can be written by the automation system via:

- FOUNDATION Fieldbus
- PROFIBUS DP
- PROFIBUS PA
- Modbus RS485
- Modbus TCP over Ethernet-APL
- EtherNet/IP
- PROFINET
- PROFINET over Ethernet-APL

### Current input 0/4 to 20 mA

<b>Current input</b>	0/4 to 20 mA (active/passive)
<b>Current span</b>	<ul style="list-style-type: none"> <li>▪ 4 to 20 mA (active)</li> <li>▪ 0/4 to 20 mA (passive)</li> </ul>
<b>Resolution</b>	1 $\mu$ A
<b>Voltage drop</b>	Typically: 0.6 to 2 V for 3.6 to 22 mA (passive)
<b>Maximum input voltage</b>	$\leq 30$ V (passive)
<b>Open-circuit voltage</b>	$\leq 28.8$ V (active)
<b>Possible input variables</b>	<ul style="list-style-type: none"> <li>▪ Pressure</li> <li>▪ Temperature</li> <li>▪ Density</li> </ul>

### Status input

<b>Maximum input values</b>	<ul style="list-style-type: none"> <li>▪ DC -3 to 30 V</li> <li>▪ If status input is active (ON): <math>R_i &gt; 3</math> k<math>\Omega</math></li> </ul>
<b>Response time</b>	Configurable: 5 to 200 ms
<b>Input signal level</b>	<ul style="list-style-type: none"> <li>▪ Low signal: DC -3 to +5 V</li> <li>▪ High signal: DC 12 to 30 V</li> </ul>
<b>Assignable functions</b>	<ul style="list-style-type: none"> <li>▪ Off</li> <li>▪ Reset the individual totalizers separately</li> <li>▪ Reset all totalizers</li> <li>▪ Flow override</li> </ul>

# Output

## Output and input variants

Depending on the option selected for output/input 1, different options are available for the other outputs and inputs. Only one option can be selected for each output/input 1 to 3. The following tables must be read vertically (↓).

Example: If the option BA "4–20 mA HART" was selected for output/input 1, one of the options A, B, D, E, F, H, I or J is available for output 2 and one of the options A, B, D, E, F, H, I or J is available for output 3.

## Output/input 1 and options for output/input 2

 Options for output/input 3 →  14

Order code for "Output; input 1" (020) →	Possible options														
Current output 4 to 20 mA HART	BA														
Current output 4 to 20 mA HART Ex i passive	↓ CA														
Current output 4 to 20 mA HART Ex i active		↓ CC													
FOUNDATION fieldbus			↓ SA												
FOUNDATION fieldbus Ex i				↓ TA											
PROFIBUS DP					↓ LA										
PROFIBUS PA						↓ GA									
PROFIBUS PA Ex i							↓ HA								
Modbus RS485								↓ MA							
Ethernet/IP 2-port switch integrated									↓ NA						
PROFINET 2-port switch integrated										↓ RA					
PROFINET over Ethernet-APL											↓ RB				
PROFINET over Ethernet-APL Ex i												↓ RC			
Modbus TCP over Ethernet-APL 10 Mbit/s, SPE 10 Mbit/s, Ethernet 100 Mbit/s													↓ MB		
Modbus TCP over Ethernet-APL, Ex i, 10 Mbit/s, Ethernet 100 Mbit/s														↓ MC	
<b>Order code for "Output; input 2" (021) →</b>	↓	↓	↓	↓	↓	↓	↓	↓	↓	↓	↓	↓	↓	↓	↓
Not used	A	A	A	A	A	A	A	A	A	A	A	A	A	A	A
Current output 4 to 20 mA	B			B		B	B		B	B	B	B		B	
Current output 4 to 20 mA Ex i passive		C	C		C			C					C		C
User-configurable input/output <sup>1)</sup>	D			D		D	D		D	D	D	D		D	
Pulse/frequency/switch output	E			E		E	E		E	E	E	E		E	
Double pulse output <sup>2)</sup>	F								F						
Pulse/frequency/switch output Ex i passive		G	G		G			G					G		G
Relay output	H			H		H	H		H	H	H	H		H	
Current input 0/4 to 20 mA	I			I		I	I		I	I	I	I		I	
Status input	J			J		J	J		J	J	J	J		J	

- 1) A specific input or output can be assigned to a user-configurable input/output →  22.
- 2) If double pulse output (F) is selected for output/input 2 (021), only the double pulse output (F) option is available for selection for output/input 3 (022).

## Output/input 1 and options for output/input 3

 Options for output/input 2 →  13

Order code for "Output; input 1" (020) →	Possible options														
Current output 4 to 20 mA HART	BA														
Current output 4 to 20 mA HART Ex i passive	↓	CA

**FOUNDATION Fieldbus**

<b>FOUNDATION Fieldbus</b>	H1, IEC 61158-2, galvanically isolated
<b>Data transfer</b>	31.25 kbit/s
<b>Current consumption</b>	10 mA
<b>Permitted supply voltage</b>	9 to 32 V
<b>Bus connection</b>	With integrated reverse polarity protection

**PROFIBUS DP**

<b>Signal encoding</b>	NRZ code
<b>Data transfer</b>	9.6 kBaud...12 MBaud
<b>Terminating resistor</b>	Integrated, can be activated via DIP switches

**PROFIBUS PA**

<b>PROFIBUS PA</b>	In accordance with EN 50170 Volume 2, IEC 61158-2 (MBP), galvanically isolated
<b>Data transmission</b>	31.25 kbit/s
<b>Current consumption</b>	10 mA
<b>Permitted supply voltage</b>	9 to 32 V
<b>Bus connection</b>	With integrated reverse polarity protection

**Modbus RS485**

<b>Physical interface</b>	RS485 in accordance with EIA/TIA-485 standard
<b>Terminating resistor</b>	Integrated, can be activated via DIP switches

**Modbus TCP over Ethernet-APL**

<b>Port 1: Modbus TCP over Ethernet-APL 10 Mbit/s</b>	
<b>Device usage</b>	<p><b>Device connection to an APL field switch (terminal 26/27)</b>                      The device may only be operated according to the following APL port classifications:</p> <ul style="list-style-type: none"> <li>▪ If used in hazardous areas: SLAA or SLAC <sup>1)</sup></li> <li>▪ If used in non-hazardous areas: SLAX</li> </ul> <p>Connection values of APL field switch (corresponds to APL port classification SPCC or SPAA, for instance):</p> <ul style="list-style-type: none"> <li>▪ Maximum input voltage: 15 V<sub>DC</sub></li> <li>▪ Minimum output values: 0.54 W</li> </ul> <p><b>Device connection to an SPE switch</b></p> <ul style="list-style-type: none"> <li>▪ In non-hazardous areas, the device can be used with an appropriate SPE switch:                             <ul style="list-style-type: none"> <li>▪ Maximum output voltage: 30 V<sub>DC</sub></li> <li>▪ Minimum output power: 1.85 W</li> </ul> </li> <li>▪ The SPE switch must support the 10BASE-T1L standard and PoDL power classes 10, 11 or 12 and have a function to disable power class detection.</li> </ul>
<b>Standards</b>	According to IEEE 802.3cg, APL port profile specification v1.0, galvanically isolated
<b>Data transfer</b>	Full-duplex (APL/SPE)
<b>Current consumption</b>	Terminal 26/27 max. approx. 45 mA
<b>Permitted supply voltage</b>	9 to 30 V
<b>Bus connection</b>	Terminal 26/27 with integrated reverse polarity protection

1) For more information on using the device in the hazardous area, see the Ex-specific Safety Instructions

<b>Port 2: Modbus TCP over Ethernet 100 Mbit/s</b>	
<b>Device usage</b>	<p><b>Device connection to a Fast Ethernet (RJ45) switch</b>                      In non-hazardous areas, the Ethernet switch must support the standard 100BASE-TX.</p>
<b>Standards</b>	In accordance with IEEE 802.3u
<b>Data transfer</b>	Half-duplex, full-duplex
<b>Current consumption</b>	-
<b>Permitted supply voltage</b>	-
<b>Bus connection</b>	Service interface (RJ45)

**EtherNet/IP**

<b>Standards</b>	In accordance with IEEE 802.3
------------------	-------------------------------

**PROFINET**

<b>Standards</b>	In accordance with IEEE 802.3
------------------	-------------------------------

## PROFINET over Ethernet-APL

<b>Device use</b>	<p><b>Device connection to an APL field switch</b></p> <p>The device may only be operated according to the following APL port classifications:</p> <ul style="list-style-type: none"> <li>▪ If used in hazardous areas: SLAA or SLAC <sup>1)</sup></li> <li>▪ If used in non-hazardous areas: SLAX</li> </ul> <p>Connection values of APL field switch (corresponds to APL port classification SPCC or SPAA, for instance):</p> <ul style="list-style-type: none"> <li>▪ Maximum input voltage: 15 V<sub>DC</sub></li> <li>▪ Minimum output values: 0.54 W</li> </ul> <p><b>Device connection to an SPE switch</b></p> <ul style="list-style-type: none"> <li>▪ In non-hazardous areas, the device can be used with an appropriate SPE switch: The device can be connected to an SPE switch with a maximum voltage of 30 V<sub>DC</sub> and a minimum output power of 1.85 W connected.</li> <li>▪ The SPE switch must support the 10BASE-T1L standard and PoDL power classes 10, 11 or 12 and have a function to disable power class detection.</li> </ul>
<b>PROFINET</b>	According to IEC 61158 and IEC 61784
<b>Ethernet-APL</b>	According to IEEE 802.3cg, APL port profile specification v1.0, galvanically isolated
<b>Data transfer</b>	10 Mbit/s
<b>Current consumption</b>	<p><b>Transmitter</b></p> <ul style="list-style-type: none"> <li>▪ Max. 400 mA (24 V)</li> <li>▪ Max. 200 mA (110 V, 50/60 Hz; 230 V, 50/60 Hz)</li> </ul>
<b>Permitted supply voltage</b>	9 to 30 V
<b>Network connection</b>	With integrated reverse polarity protection

1) For more information on using the device in the hazardous area, see the Ex-specific Safety Instructions

## Current output 4 to 20 mA

<b>Order code</b>	"Output; input 2" (21), "Output; input 3" (022): Option B: current output 4 to 20 mA
<b>Signal mode</b>	Can be set to: <ul style="list-style-type: none"> <li>▪ Active</li> <li>▪ Passive</li> </ul>
<b>Current range</b>	Can be set to: <ul style="list-style-type: none"> <li>▪ 4 to 20 mA NAMUR</li> <li>▪ 4 to 20 mA US</li> <li>▪ 4 to 20 mA</li> <li>▪ 0 to 20 mA (only if the signal mode is active)</li> <li>▪ Fixed current</li> </ul>
<b>Maximum output values</b>	22.5 mA
<b>Open-circuit voltage</b>	DC 28.8 V (active)
<b>Maximum input voltage</b>	DC 30 V (passive)
<b>Load</b>	0 to 700 Ω
<b>Resolution</b>	0.38 μA

<b>Damping</b>	Configurable: 0 to 999.9 s
<b>Assignable measured variables</b>	<ul style="list-style-type: none"> <li>▪ Mass flow</li> <li>▪ Volume flow</li> <li>▪ Corrected volume flow</li> <li>▪ Density</li> <li>▪ Reference density</li> <li>▪ Temperature</li> <li>▪ Electronics temperature</li> <li>▪ Oscillation frequency 0</li> <li>▪ Oscillation damping 0</li> <li>▪ Signal asymmetry</li> <li>▪ Exciter current 0</li> </ul> <p> The range of options increases if the measuring device has one or more application packages.</p>

**Current output 4 to 20 mA Ex i passive**

<b>Order code</b>	"Output; input 2" (21), "Output; input 3" (022): Option C: current output 4 to 20 mA Ex i passive
<b>Signal mode</b>	Passive
<b>Current range</b>	Can be set to: <ul style="list-style-type: none"> <li>▪ 4 to 20 mA NAMUR</li> <li>▪ 4 to 20 mA US</li> <li>▪ 4 to 20 mA</li> <li>▪ Fixed current</li> </ul>
<b>Maximum output values</b>	22.5 mA
<b>Maximum input voltage</b>	DC 30 V
<b>Load</b>	0 to 700 Ω
<b>Resolution</b>	0.38 µA
<b>Damping</b>	Configurable: 0 to 999 s
<b>Assignable measured variables</b>	<ul style="list-style-type: none"> <li>▪ Mass flow</li> <li>▪ Volume flow</li> <li>▪ Corrected volume flow</li> <li>▪ Density</li> <li>▪ Reference density</li> <li>▪ Temperature</li> <li>▪ Electronics temperature</li> <li>▪ Oscillation frequency 0</li> <li>▪ Oscillation damping 0</li> <li>▪ Signal asymmetry</li> <li>▪ Exciter current 0</li> </ul> <p> The range of options increases if the measuring device has one or more application packages.</p>

**Pulse/frequency/switch output**

<b>Function</b>	Can be configured as pulse, frequency or switch output
<b>Version</b>	Open collector Can be set to: <ul style="list-style-type: none"> <li>▪ Active</li> <li>▪ Passive</li> <li>▪ Passive NAMUR</li> </ul> <p> Ex-i, passive</p>
<b>Maximum input values</b>	DC 30 V, 250 mA (passive)
<b>Open-circuit voltage</b>	DC 28.8 V (active)
<b>Voltage drop</b>	For 22.5 mA: ≤ DC 2 V

Pulse output	
Maximum input values	DC 30 V, 250 mA (passive)
Maximum output current	22.5 mA (active)
Open-circuit voltage	DC 28.8 V (active)
Pulse width	Configurable: 0.05 to 2 000 ms
Maximum pulse rate	10 000 Impulse/s
Pulse value	Configurable
Assignable measured variables	<ul style="list-style-type: none"> <li>▪ Mass flow</li> <li>▪ Volume flow</li> <li>▪ Corrected volume flow</li> </ul>  The range of options increases if the measuring device has one or more application packages.
Frequency output	
Maximum input values	DC 30 V, 250 mA (passive)
Maximum output current	22.5 mA (active)
Open-circuit voltage	DC 28.8 V (active)
Output frequency	Configurable: end value frequency 2 to 10 000 Hz ( $f_{\max} = 12\,500$ Hz)
Damping	Configurable: 0 to 999.9 s
Pulse/pause ratio	1:1
Assignable measured variables	<ul style="list-style-type: none"> <li>▪ Mass flow</li> <li>▪ Volume flow</li> <li>▪ Corrected volume flow</li> <li>▪ Density</li> <li>▪ Reference density</li> <li>▪ Temperature</li> <li>▪ Electronics temperature</li> <li>▪ Oscillation frequency 0</li> <li>▪ Oscillation damping 0</li> <li>▪ Signal asymmetry</li> <li>▪ Exciter current 0</li> </ul>  The range of options increases if the measuring device has one or more application packages.
Switch output	
Maximum input values	DC 30 V, 250 mA (passive)
Open-circuit voltage	DC 28.8 V (active)
Switching behavior	Binary, conductive or non-conductive
Switching delay	Configurable: 0 to 100 s

<b>Number of switching cycles</b>	Unlimited
<b>Assignable functions</b>	<ul style="list-style-type: none"> <li>▪ Disable</li> <li>▪ On</li> <li>▪ Diagnostic behavior</li> <li>▪ Limit                             <ul style="list-style-type: none"> <li>▪ Mass flow</li> <li>▪ Volume flow</li> <li>▪ Corrected volume flow</li> <li>▪ Density</li> <li>▪ Reference density</li> <li>▪ Temperature</li> <li>▪ Totalizer 1-3</li> </ul> </li> <li>▪ Flow direction monitoring</li> <li>▪ Status                             <ul style="list-style-type: none"> <li>▪ Partially filled pipe detection</li> <li>▪ Low flow cut off</li> </ul> </li> </ul> <p> The range of options increases if the measuring device has one or more application packages.</p>

### Double pulse output

<b>Function</b>	Double pulse
<b>Version</b>	Open collector Can be set to: <ul style="list-style-type: none"> <li>▪ Active</li> <li>▪ Passive</li> <li>▪ Passive NAMUR</li> </ul>
<b>Maximum input values</b>	DC 30 V, 250 mA (passive)
<b>Open-circuit voltage</b>	DC 28.8 V (active)
<b>Voltage drop</b>	For 22.5 mA: ≤ DC 2 V
<b>Output frequency</b>	Configurable: 0 to 1000 Hz
<b>Damping</b>	Configurable: 0 to 999 s
<b>Pulse/pause ratio</b>	1:1
<b>Assignable measured variables</b>	<ul style="list-style-type: none"> <li>▪ Mass flow</li> <li>▪ Volume flow</li> <li>▪ Corrected volume flow</li> <li>▪ Density</li> <li>▪ Reference density</li> <li>▪ Temperature</li> </ul> <p> The range of options increases if the measuring device has one or more application packages.</p>

### Relay output

<b>Function</b>	Switch output
<b>Version</b>	Relay output, galvanically isolated
<b>Switching behavior</b>	Can be set to: <ul style="list-style-type: none"> <li>▪ NO (normally open), factory setting</li> <li>▪ NC (normally closed)</li> </ul>

<b>Maximum switching capacity (passive)</b>	<ul style="list-style-type: none"> <li>▪ DC 30 V, 0.1 A</li> <li>▪ AC 30 V, 0.5 A</li> </ul>
<b>Assignable functions</b>	<ul style="list-style-type: none"> <li>▪ Disable</li> <li>▪ On</li> <li>▪ Diagnostic behavior</li> <li>▪ Limit <ul style="list-style-type: none"> <li>▪ Mass flow</li> <li>▪ Volume flow</li> <li>▪ Corrected volume flow</li> <li>▪ Density</li> <li>▪ Reference density</li> <li>▪ Temperature</li> <li>▪ Totalizer 1-3</li> </ul> </li> <li>▪ Flow direction monitoring</li> <li>▪ Status <ul style="list-style-type: none"> <li>▪ Partially filled pipe detection</li> <li>▪ Low flow cut off</li> </ul> </li> </ul> <p> The range of options increases if the measuring device has one or more application packages.</p>

### User-configurable input/output

**One** specific input or output is assigned to a user-configurable input/output (configurable I/O) during device commissioning.

The following inputs and outputs are available for assignment:

- Choice of current output: 4 to 20 mA (active), 0/4 to 20 mA (passive)
- Pulse/frequency/switch output
- Choice of current input: 4 to 20 mA (active), 0/4 to 20 mA (passive)
- Status input

The technical values correspond to those of the inputs and outputs described in this section.

### Signal on alarm

Depending on the interface, failure information is displayed as follows:

#### HART current output

<b>Device diagnostics</b>	Device condition can be read out via HART Command 48
---------------------------	--

#### PROFIBUS PA

<b>Status and alarm messages</b>	Diagnostics in accordance with PROFIBUS PA Profile 3.02
<b>Failure current FDE (Fault Disconnection Electronic)</b>	0 mA

#### PROFIBUS DP

<b>Status and alarm messages</b>	Diagnostics in accordance with PROFIBUS PA Profile 3.02
----------------------------------	---

#### EtherNet/IP

<b>Device diagnostics</b>	Device condition can be read out in Input Assembly
---------------------------	--

#### PROFINET

<b>Device diagnostics</b>	According to "Application Layer protocol for decentralized periphery", Version 2.3
---------------------------	--

**PROFINET over Ethernet-APL**

<b>Device diagnostics</b>	Diagnostics according to PROFINET PA Profile 4.02
---------------------------	---

**FOUNDATION Fieldbus**

<b>Status and alarm messages</b>	Diagnostics in accordance with FF-891
<b>Failure current FDE (Fault Disconnection Electronic)</b>	0 mA

**Modbus RS485**

<b>Failure mode</b>	Choose from: <ul style="list-style-type: none"> <li>▪ NaN value instead of current value</li> <li>▪ Last valid value</li> </ul>
---------------------	---

**Modbus TCP over Ethernet-APL/SPE/Fast Ethernet**

<b>Failure mode</b>	Choose from: <ul style="list-style-type: none"> <li>▪ NaN value instead of current value</li> <li>▪ Last valid value</li> </ul>
---------------------	---

**Current output**

<b>Current output 4-20 mA</b>	
<b>Failure mode</b>	Configurable: <ul style="list-style-type: none"> <li>▪ 4 to 20 mA in accordance with NAMUR recommendation NE 43</li> <li>▪ 4 to 20 mA in accordance with US</li> <li>▪ Min. value: 3.59 mA</li> <li>▪ Max. value: 22.5 mA</li> <li>▪ Definable value between: 3.59 to 22.5 mA</li> <li>▪ Actual value</li> <li>▪ Last valid value</li> </ul>
<b>Current output 4-20 mA</b>	
<b>Failure mode</b>	Configurable: <ul style="list-style-type: none"> <li>▪ Maximum alarm: 22 mA</li> <li>▪ Definable value between: 0 to 20.5 mA</li> </ul>

**Pulse/frequency/switch output**

<b>Pulse output</b>	
<b>Failure mode</b>	Configurable: <ul style="list-style-type: none"> <li>▪ Actual value</li> <li>▪ No pulses</li> </ul>
<b>Frequency output</b>	
<b>Failure mode</b>	Configurable: <ul style="list-style-type: none"> <li>▪ Actual value</li> <li>▪ 0 Hz</li> <li>▪ Definable value between: 2 to 12 500 Hz</li> </ul>
<b>Switch output</b>	
<b>Failure mode</b>	Configurable: <ul style="list-style-type: none"> <li>▪ Current status</li> <li>▪ Open</li> <li>▪ Closed</li> </ul>

**Relay output**

<b>Failure mode</b>	Choose from: <ul style="list-style-type: none"> <li>■ Current status</li> <li>■ Open</li> <li>■ Closed</li> </ul>
---------------------	---

**Local display**

<b>Plain text display</b>	With information on cause and remedial measures
<b>Backlight</b>	Red lighting indicates a device error.

Status signal as per NAMUR recommendation NE 107

**Interface/protocol**

- Via digital communication:
  - HART protocol
  - FOUNDATION Fieldbus
  - PROFIBUS PA
  - PROFIBUS DP
  - Modbus RS485
  - Modbus TCP over Ethernet-APL
  - EtherNet/IP
  - PROFINET
  - PROFINET over Ethernet-APL
- Via service interface
  - Service interface CDI-RJ45
  - Via service interface/port 2: (RJ45)
  - WLAN interface
- Plain text display
  - With information on cause and remedial actions
  - Modbus TCP

Additional information on remote operation → 95

**Web browser**

<b>Plain text display</b>	With information on cause and remedial measures
---------------------------	---

**LEDs**

<b>Status information</b>	Status indicated by various LEDs The following information is displayed depending on the device version: <ul style="list-style-type: none"> <li>■ Supply voltage active</li> <li>■ Data transmission active</li> <li>■ Device alarm/error has occurred</li> <li>■ Network available <sup>1)</sup></li> <li>■ Connection established <sup>1)</sup></li> <li>■ Diagnostic status <sup>2)</sup></li> <li>■ PROFINET blinking feature <sup>3)</sup></li> </ul>
---------------------------	---

1) Only available for PROFINET, PROFINET over Ethernet-APL, Modbus over Ethernet-APL, Ethernet/IP

2) Only available for Modbus over Ethernet-APL

3) Only available for PROFINET, PROFINET over Ethernet-APL,

## Power supply

### Terminal assignment

### Transmitter: supply voltage, input/outputs

#### HART

Supply voltage		Input/output 1 (Port 1)		Input/output 2		Input/output 3		Service interface (Port 2)
1 (+)	2 (-)	26 (+)	27 (-)	24 (+)	25 (-)	22 (+)	23 (-)	CDI-RJ45
The terminal assignment depends on the specific device version ordered → 13.								

#### FOUNDATION fieldbus

Supply voltage		Input/output 1 (Port 1)		Input/output 2		Input/output 3		Service interface (Port 2)
1 (+)	2 (-)	26 (A)	27 (B)	24 (+)	25 (-)	22 (+)	23 (-)	CDI-RJ45
The terminal assignment depends on the specific device version ordered → 13.								

#### PROFIBUS DP

Supply voltage		Input/output 1 (Port 1)		Input/output 2		Input/output 3		Service interface (Port 2)
1 (+)	2 (-)	26 (B)	27 (A)	24 (+)	25 (-)	22 (+)	23 (-)	CDI-RJ45
The terminal assignment depends on the specific device version ordered → 13.								

#### PROFIBUS PA

Supply voltage		Input/output 1 (Port 1)		Input/output 2		Input/output 3		Service interface (Port 2)
1 (+)	2 (-)	26 (B)	27 (A)	24 (+)	25 (-)	22 (+)	23 (-)	CDI-RJ45
The terminal assignment depends on the specific device version ordered → 13.								

#### Modbus RS485

Supply voltage		Input/output 1 (Port 1)		Input/output 2		Input/output 3		Service interface (Port 2)
1 (+)	2 (-)	26 (B)	27 (A)	24 (+)	25 (-)	22 (+)	23 (-)	CDI-RJ45
The terminal assignment depends on the specific device version ordered → 13.								

#### Modbus TCP

Supply voltage		Input/output 1 (Port 1) <sup>1)</sup>		Input/output 2		Input/output 3		Service interface (Port 2) <sup>1)</sup>
1 (+)	2 (-)	26 (+)	27 (-)	24 (+)	25 (-)	22 (+)	23 (-)	CDI-RJ45
The terminal assignment depends on the specific device version ordered → 13.								

1) For Modbus TCP communication, either port 1 OR port 2 can be used.

PROFINET

Supply voltage		Input/output 1 (Port 1) <sup>1)</sup>		Input/output 2		Input/output 3		Service interface (Port 2) <sup>1)</sup>
1 (+)	2 (-)	RJ45		24 (+)	25 (-)	22 (+)	23 (-)	CDI-RJ45
The terminal assignment depends on the specific device version ordered →  13.								

1) Port can be used for communication or as a service interface (CDI-RJ45).

PROFINET over Ethernet-APL

Supply voltage		Input/output 1 (Port 1)		Input/output 2		Input/output 3		Service interface (Port 2) <sup>1)</sup>
1 (+)	2 (-)	26 (+)	27 (-)	24 (+)	25 (-)	22 (+)	23 (-)	CDI-RJ45
The terminal assignment depends on the specific device version ordered →  13.								

1) No PROFINET communication available on port 2

Ethernet/IP

Supply voltage		Input/output 1 (Port 1) <sup>1)</sup>		Input/output 2		Input/output 3		Service interface (Port 2) <sup>1)</sup>
1 (+)	2 (-)	RJ45		24 (+)	25 (-)	22 (+)	23 (-)	CDI-RJ45
The terminal assignment depends on the specific device version ordered →  13.								

1) Port can be used for communication or as a service interface (CDI-RJ45).

Terminal assignment of the remote display and operating module →  42.

For information on the pin assignment of the device plugs, see the Operating Instructions for the device.

Available device plugs

Device plugs may not be used in hazardous areas!

**Device plugs for Proline 300:**

Order code for "Input; output 1"

- Option **SA** "FOUNDATION Fieldbus" →  38
- Option **GA** "PROFIBUS PA" →  39
- Option **NA** "EtherNet/IP" →  39
- Option **RA** "PROFINET" →  39
- Option **RB** "PROFINET over Ethernet-APL" →  39
- Option **MB** "Modbus TCP" →  39

**Device plug for connecting to the service interface:**

Order code for "Accessory mounted"

Option **NB**, RJ45 M12 adapter (service interface) →  49

**Order code for "Input; output 1", option SA "FOUNDATION fieldbus"**

Order code for "Electrical connection"	Cable entry/connection →  41	
	2	3
M, 3, 4, 5	7/8" plug	-

**Order code for "Input; output 1", option GA "PROFIBUS PA"**

Order code for "Electrical connection"	Cable entry/connection → 41	
	2	3
L, N, P, U	Connector M12×1	-

**Order code for "Input; output 1", option NA "EtherNet/IP"**

Order code for "Electrical connection"	Cable entry/connection → 41	
	2	3
L, N, P, U	Connector M12×1	-
R <sup>1) 2)</sup> S <sup>1) 2)</sup> , T <sup>1) 2)</sup> , V <sup>1) 2)</sup>	Connector M12×1	Connector M12×1

- 1) Not compatible with an external WLAN antenna (order code for "Accessory enclosed", option P8), an RJ45 M12 adapter for the service interface (order code for "Accessory mounted", option NB)
- 2) Suitable for integrating the device into a ring topology.

**Order code for "Input; output 1", option RA "PROFINET"**

Order code for "Electrical connection"	Cable entry/connection → 41	
	2	3
L, N, P, U	Connector M12×1	-
R <sup>1) 2)</sup> , S <sup>1) 2)</sup> , T <sup>1) 2)</sup> , V <sup>1) 2)</sup>	Connector M12×1	Connector M12×1

- 1) Not compatible with an external WLAN antenna (order code for "Accessory enclosed", option P8), an RJ45 M12 adapter for the service interface (order code for "Accessory mounted", option NB)
- 2) Suitable for integrating the device into a ring topology.

**Order code for "Input; output 1", option RB "PROFINET over Ethernet-APL"**

Order code for "Electrical connection"	Cable entry/connection → 41	
	2	3
L, N, P, U	Connector M12×1	-

**Order code for "Input; output 1", option MB "Modbus TCP over Ethernet-APL"**

Order code for "Electrical connection"	Accessories	Cable entry/connection → 40	
		2	3
L, N, P, U	-	Connector M12×1 A-coded	-
L, N, P, U	NB <sup>1)</sup>	Connector M12×1 A-coded	Connector M12×1 <sup>1)</sup> D-coded
1 <sup>2)</sup> , 2 <sup>2)</sup> , 7 <sup>2)</sup> , 8 <sup>2)</sup>	-	-	Connector M12×1 D-coded

- 1) Cannot be used as a Modbus TCP port.
- 2) Not compatible with an external WLAN antenna (order code for "Accessory enclosed", option P8, an RJ45 M12 adapter for the service interface (order code for "Accessory mounted", option NB) or a remote operating and display module DKX001.

## Order code for "Accessory mounted", option NB: "Adapter RJ45 M12 (service interface)"

Order code for "Accessory mounted"	Cable entry/connection →  40	
	Cable entry 2	Cable entry 3
NB <sup>1)</sup>	-	Connector M12×1

1) Not compatible with electrical connection option 1, 2, 7, 8

Supply voltage	Order code for "Power supply"	Terminal voltage		Frequency range
	Option D	DC 24 V	±20%	-
Option E	AC 100 to 240 V	-15 to 10%	50/60 Hz	
Option I	DC 24 V	±20%	-	
	AC 100 to 240 V	-15 to 10%	50/60 Hz	

## Power consumption

## Transmitter

Max. 10 W (active power)

switch-on current	Max. 36 A (<5 ms) as per NAMUR Recommendation NE 21
-------------------	---

## Current consumption

## Transmitter

- Max. 400 mA (24 V)
- Max. 200 mA (110 V, 50/60 Hz; 230 V, 50/60 Hz)

## Power supply failure

- Totalizers stop at the last value measured.
- Depending on the device version, the configuration is retained in the device memory or in the plug-in memory (HistoROM DAT).
- Error messages (incl. total operated hours) are stored.

## Overcurrent protection element

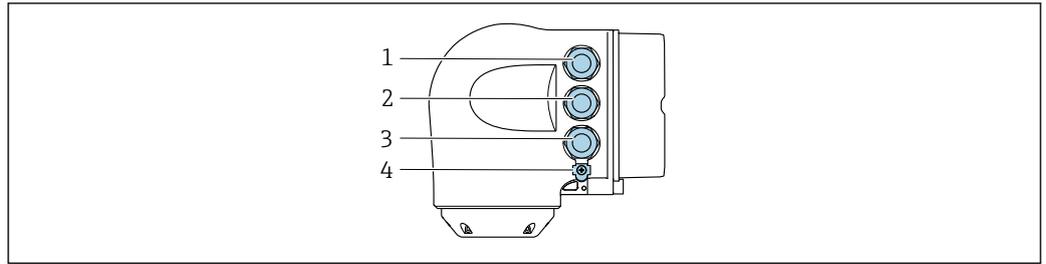

The device must be operated with a dedicated circuit breaker, as it does not have an ON/OFF switch of its own.

- The circuit breaker must be easy to reach and labeled accordingly.
- Permitted nominal current of the circuit breaker: 2 A up to maximum 10 A.

## Electrical connection

## Transmitter connection

-  Terminal assignment →  37
- Device plugs available →  38

A0026781

- 1 Terminal connection for supply voltage
- 2 Terminal connection for signal transmission, input/output
- 3 Terminal connection for signal transmission, input/output or terminal for network connection via service interface (CDI-RJ45); Optional: terminal connection for external WLAN antenna or connection for remote display and operating module DKX001
- 4 Protective ground connection (PE)

**i** An adapter for the RJ45 to the M12 connector is optionally available:  
Order code for "Accessories", option **NB**: "Adapter RJ45 M12 (service interface)"

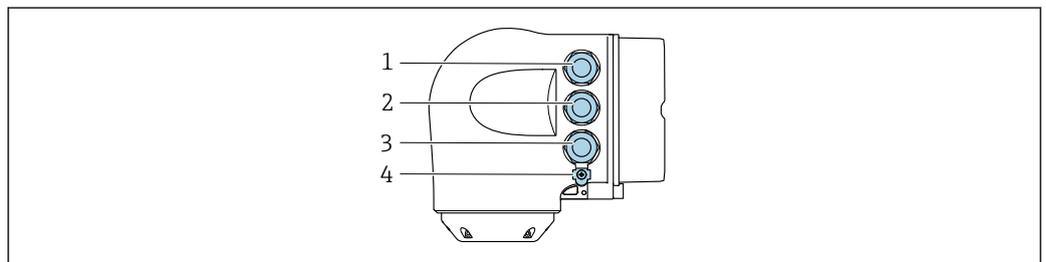

The adapter connects the service interface (CDI-RJ45) to an M12 connector mounted in the cable entry. The connection to the service interface can be established via an M12 connector without opening the device.

**i** Network connection via service interface (CDI-RJ45) → 102

*Connecting in a ring topology*

Device versions with EtherNet/IP and PROFINET communication protocols can be integrated into a ring topology. The device is integrated via the terminal connection for signal transmission (output 1) and the connection to the service interface (CDI-RJ45).

- i** Integrating the transmitter into a ring topology:
- EtherNet/IP
  - PROFINET

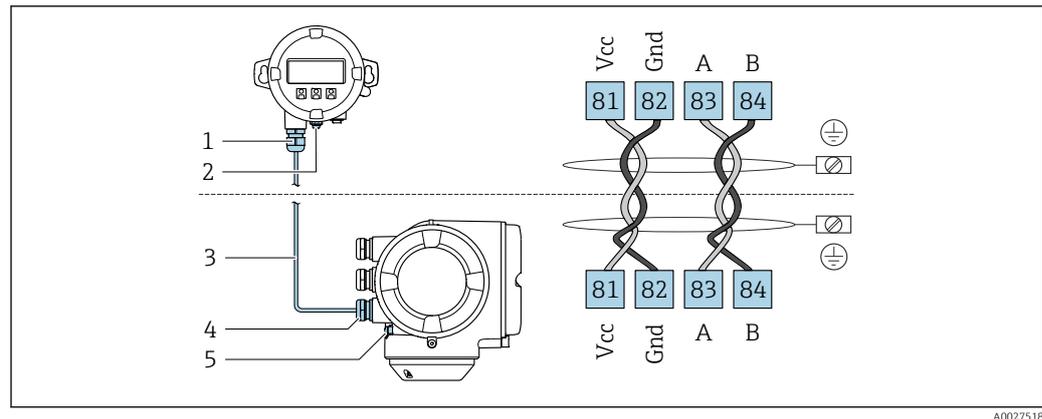

A0026781

- 1 Terminal connection for supply voltage
- 2 Terminal connection for signal transmission: PROFINET or EtherNet/IP (RJ45 plug)
- 3 Connection to service interface (CDI-RJ45)
- 4 Protective ground connection (PE)

**i** If the device has additional inputs/outputs, these are routed in parallel via the cable entry for connection to the service interface (CDI-RJ45).

### Connecting the remote display and operating module DKX001

- i** The remote display and operating module DKX001 is available as an optional extra → 114..
- The remote display and operating module DKX001 is only available for the following housing versions, order code for "Housing":
    - Option A "Aluminum, coated"
    - Option L "Cast, stainless"
  - The measuring instrument is always supplied with a dummy cover when the remote display and operating module DKX001 is ordered directly with the measuring instrument. Display or operation at the transmitter is not possible in this case.
  - If ordered subsequently, the remote display and operating module DKX001 may not be connected at the same time as the existing measuring instrument display module. Only one display or operation unit may be connected to the transmitter at any one time.

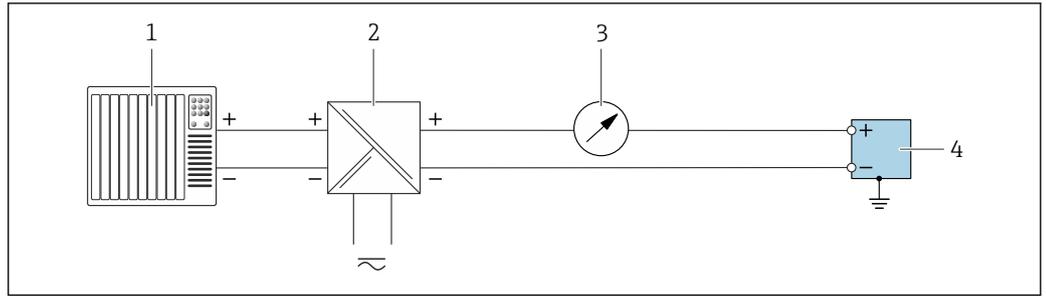

- 1 Remote display and operating module DKX001  
 2 Protective ground connection (PE)  
 3 Connecting cable  
 4 Measuring instrument  
 5 Protective ground connection (PE)

### Connection examples

Current output 4 to 20 mA (without HART)

- 2** Connection example for 4 to 20 mA current output (active)
- 1 Automation system with current input (e.g. PLC)  
 2 Optional additional display unit: Observe maximum load  
 3 Flowmeter with current output (active)

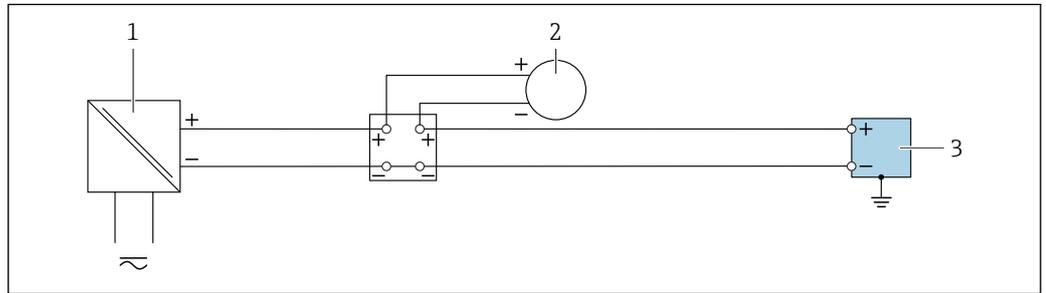

A0055852

3 Connection example for 4 to 20 mA current output (passive)

- 1 Automation system with current input (e.g. PLC)
- 2 Power supply
- 3 Optional additional display unit: Observe maximum load
- 4 Transmitter with current output (passive)

Current input 4 to 20 mA

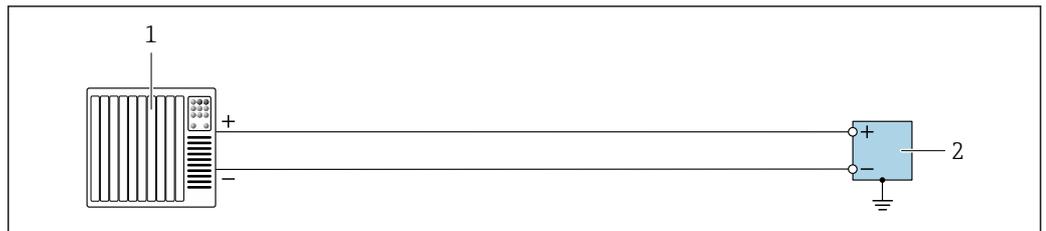

A0055853

4 Connection example for 4 to 20 mA current input

- 1 Power supply
- 2 External measuring instrument with 4 to 20 mA passive current output. e.g. pressure or temperature
- 3 Transmitter with 4 to 20 mA current input

Pulse output/frequency output/switch output

A0055856

5 Connection example for pulse output/frequency output/switch output (active)

- 1 Automation system with pulse input/frequency input/switch input (e.g. PLC)
- 2 Transmitter with pulse output/frequency output/switch output (active)

A0055855

6 Connection example for pulse output/frequency output/switch output (passive)

- 1 Automation system with pulse input/frequency input/switch input (e.g. PLC)
- 2 Power supply
- 3 Transmitter with pulse output/frequency output/switch output (passive)

#### Relay output

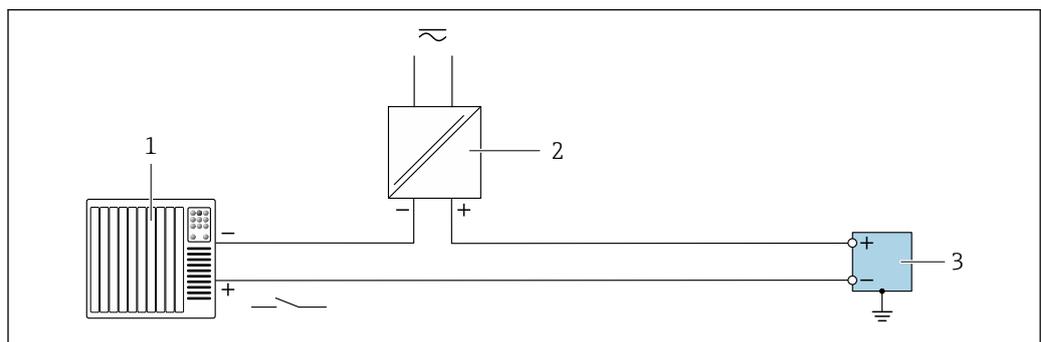

A0055859

7 Connection example for relay output

- 1 Automation system with switch input (e.g. PLC)
- 2 Power supply
- 3 Transmitter with relay output

#### Status input

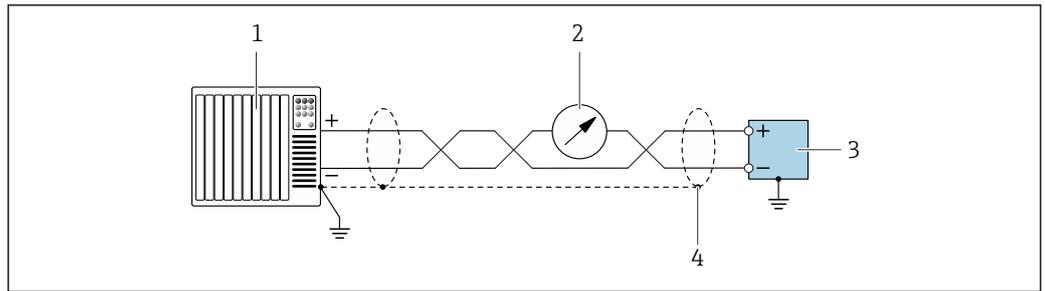

A0055860

8 Connection example for status input

- 1 Automation system with switch output passive e.g. PLC)
- 2 Power supply
- 3 Transmitter with status input

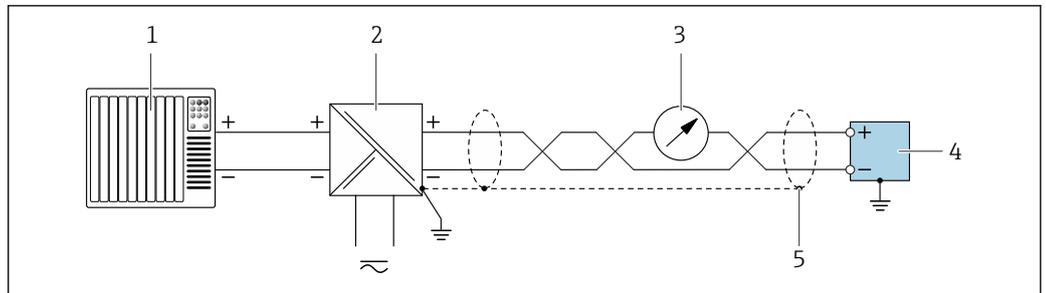

Current output 4 to 20 mA HART

A0055862

9 Connection example for 4 to 20 mA current output with HART (active)

- 1 Automation system with 4 to 20 mA current input with HART (e.g. PLC)
- 2 Optional display unit: Note maximum load
- 3 Transmitter with 4 to 20 mA current output with HART (active)
- 4 Ground cable shield at one end. For installations in compliance with NAMUR NE 89, grounding of the cable shield on both sides is required.

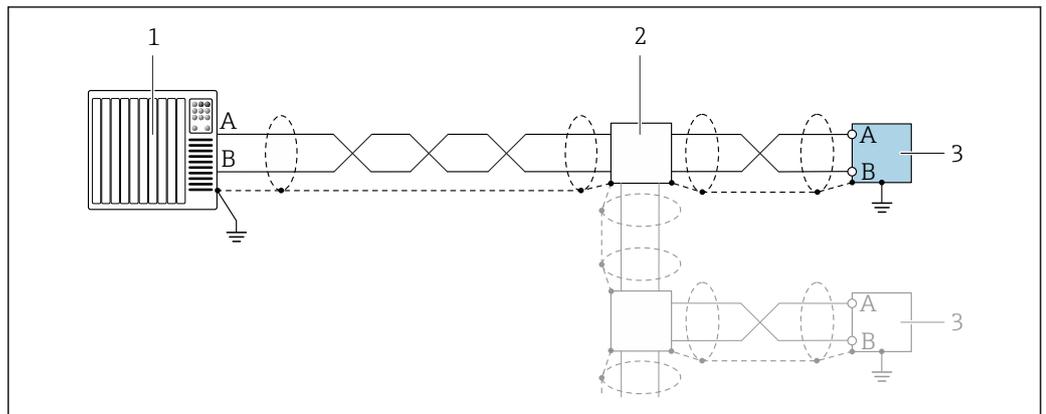

A0055861

10 Connection example for 4 to 20 mA current output with HART (passive)

- 1 Automation system with 4 to 20 mA current input with HART (e.g. PLC)
- 2 Power supply
- 3 Optional display unit: Note maximum load
- 4 Transmitter with 4 to 20 mA current output with HART (passive)
- 5 Ground cable shield at one end. For installations in compliance with NAMUR NE 89, grounding of the cable shield on both sides is required.

Modbus RS485

A0055863

11 Connection example for Modbus RS485

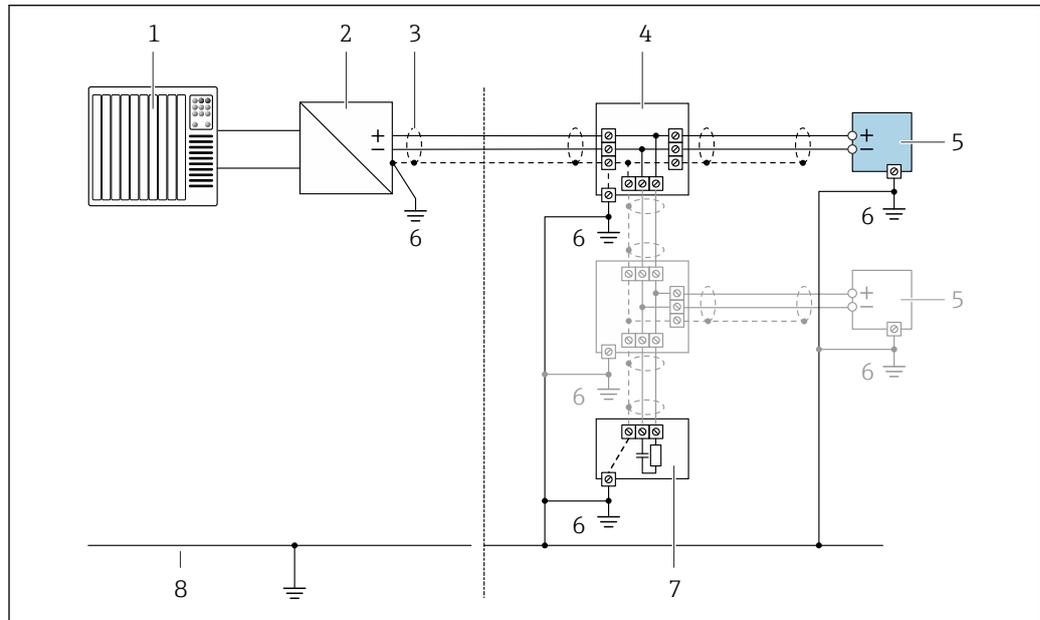

- 1 Automation system with Modbus master (e.g. PLC)
- 2 Optional distribution box
- 3 Transmitter with Modbus RS485

*PROFIBUS PA*

See <https://www.profibus.com> "PROFIBUS Installation Guidelines".

*PROFIBUS DP*

See <https://www.profibus.com> "PROFIBUS Installation Guidelines".

*FOUNDATION Fieldbus*

A0028768

12 Connection example for FOUNDATION Fieldbus

- 1 Automation system (e.g. PLC)
- 2 Power Conditioner (FOUNDATION Fieldbus)
- 3 Cable shield provided at one end. The cable shield must be grounded at both ends to comply with EMC requirements; observe cable specifications
- 4 T-box
- 5 Measuring instrument
- 6 Local grounding
- 7 Bus terminator
- 8 Potential equalization conductor

*PROFINET*

See <https://www.profibus.com> "PROFINET Planning guideline".

*EtherNet/IP*

See <https://www.odva.org> "EtherNet/IP Media Planning & Installation Manual".

*Ethernet-APL*

See <https://www.profibus.com> "Ethernet-APL White Paper"

**Potential equalization****Requirements**

For potential equalization:

- Pay attention to in-house grounding concepts
- Take account of operating conditions like the pipe material and grounding
- Connect the medium, sensor and transmitter to the same electric potential
- Use a ground cable with a minimum cross-section of 6 mm<sup>2</sup> (10 AWG) and a cable lug for potential equalization connections

**Terminals**

Spring-loaded terminals: Suitable for strands and strands with ferrules.  
 Conductor cross-section 0.2 to 2.5 mm<sup>2</sup> (24 to 12 AWG).

**Cable entries**

- Cable gland: M20 × 1.5 with cable Ø 6 to 12 mm (0.24 to 0.47 in)
- Thread for cable entry:
  - NPT ½"
  - G ½"
  - M20
- Device plug for digital communication: M12  
 Only available for certain device versions →  38.

**Pin assignment, device plug**

**FOUNDATION Fieldbus**

	Pin	Assignment		Coding	Plug/socket
	1	+	Signal +	A	Plug
	2	-	Signal -		
	3		Cable shield <sup>1</sup>		
	4		Not used		
	Metal plug housing		Cable shield		
<sup>1</sup> If a cable shield is used					

**PROFIBUS PA**

	Pin	Assignment		Coding	Plug/socket
	1	+	PROFIBUS PA +	A	Plug
	2		Grounding		
	3	-	PROFIBUS PA -		
	4		Not used		
	Met al plug hous ing		Cable shield		

Recommended plug:

- Binder, series 713, part no. 99 1430 814 04
- Phoenix, part no. 1413934 SACC-FS-4QO SH PBPA SCO

**PROFINET**

	Pin	Assignment		Coding	Plug/socket
	1	+	TD +	D	Socket
	2	+	RD +		
	3	-	TD -		
	4	-	RD -		
	Metal plug housing		Cable shield		

Recommended plug:

- Binder, series 825, part no. 99 3729 810 04
- Phoenix, part no. 1543223 SACC-M12MSD-4Q

**PROFINET over Ethernet-APL**

	Pin	Assignment	Coding	Plug/socket
	1	Ethernet-APL signal -	A	Socket
	2	Ethernet-APL signal +		
	3	Cable shield <sup>1</sup>		
	4	Not used		
Metal plug housing	Cable shield			
<sup>1</sup> If a cable shield is used				

- i** Recommended plug:
- Binder, series 713, part no. 99 1430 814 04
  - Phoenix, part no. 1413934 SACC-FS-4QO SH PBPA SCO

**Modbus TCP over Ethernet-APL 10 Mbit/s**

	Pin	Assignment	Coding	Plug/socket
	1	Ethernet-APL signal -	A	Socket
	2	Ethernet-APL signal +		
	3	Cable shield <sup>1</sup>		
	4	Not used		
Metal plug housing	Cable shield			
<sup>1</sup> If a cable shield is used				

- i** Recommended plug:
- Binder, series 713, part no. 99 1430 814 04
  - Phoenix, part no. 1413934 SACC-FS-4QO SH PBPA SCO

**Modbus TCP over Ethernet 100 Mbit/s**

	Pin	Assignment	Coding	Plug/socket	
	1	+	Tx	D	Socket
	2	+	Rx		
	3	-	Tx		
	4	-	Rx		

**EtherNet/IP**

	Pin	Assignment	Coding	Plug/socket	
	1	+	Tx	D	Socket
	2	+	Rx		
	3	-	Tx		
	4	-	Rx		
Metal plug housing		Cable shield			

-  Recommended plug:
- Binder, series 825, part no. 99 3729 810 04
  - Phoenix, part no. 1543223 SACC-M12MSD-4Q

**Service interface**

Order code for "Accessory mounted", option **NB**: "Adapter RJ45 M12 (service interface)"

	Pin	Assignment		Coding	Plug/socket
	1	+	Tx	D	Socket
	2	+	Rx		
	3	-	Tx		
4	-	Rx			

-  Recommended plug:
- Binder, series 825, part no. 99 3729 810 04
  - Phoenix, part no. 1543223 SACC-M12MSD-4Q

**Cable specification**

**Permitted temperature range**

- The installation guidelines that apply in the country of installation must be observed.
- The cables must be suitable for the minimum and maximum temperatures to be expected.

**Power supply cable (incl. conductor for the inner ground terminal)**

Standard installation cable is sufficient.

**Protective grounding cable for the outer ground terminal**

Conductor cross-section < 6 mm<sup>2</sup> (10 AWG)  
 Larger cross-sections can be connected using a cable lug.  
 The grounding impedance must be less than 2 Ω.

**Signal cable**

-  For custody transfer, all signal lines must be shielded cables (tinned copper braiding, optical coverage ≥ 85 %). The cable shield must be connected on both sides.

*4 to 20 mA current input*

Standard installation cable is sufficient.

*Pulse/frequency/switch output*

Standard installation cable is sufficient.

*Relay output*

Standard installation cable is sufficient.

*Status input*

Standard installation cable is sufficient.

*Current output 4 to 20 mA HART*

Shielded twisted-pair cable.

-  See <https://www.fieldcommgroup.org> "HART PROTOCOL SPECIFICATIONS".

*Modbus RS485*

Shielded twisted-pair cable.

-  See <https://modbus.org> "MODBUS over Serial Line Specification and Implementation Guide".

*PROFIBUS PA*

Shielded twisted-pair cable. Cable type A is recommended.

See <https://www.profibus.com> "PROFIBUS Installation Guidelines".

*PROFIBUS DP*

Shielded twisted-pair cable. Cable type A is recommended.

See <https://www.profibus.com> "PROFIBUS Installation Guidelines".

*PROFINET*

Only PROFINET cables.

See <https://www.profibus.com> "PROFINET Planning guideline".

*EtherNet/IP*

Twisted-pair Ethernet CAT 5 or better.

See <https://www.odva.org> "EtherNet/IP Media Planning & Installation Manual".

*Ethernet-APL*

Shielded twisted-pair cable. Cable type A is recommended.

See <https://www.profibus.com> Ethernet-APL White Paper "

*FOUNDATION Fieldbus*

Twisted, shielded two-wire cable.

For further information on planning and installing FOUNDATION Fieldbus networks see:

- Operating Instructions for "FOUNDATION Fieldbus Overview" (BA00013S)
- FOUNDATION Fieldbus Guideline
- IEC 61158-2 (MBP)

**Connecting cable for transmitter - remote display and operating module DKX001***Standard cable*

A standard cable can be used as the connecting cable.

<b>Standard cable</b>	4 cores (2 pairs); pair-stranded with common shield
<b>Shielding</b>	Tin-plated copper-braid, optical cover ≥ 85 %
<b>Capacitance: core/shield</b>	Maximum 1 000 nF for Zone 1; Class I, Division 1
<b>L/R</b>	Maximum 24 μH/Ω for Zone 1; Class I, Division 1
<b>Cable length</b>	Maximum 300 m (1 000 ft), see the following table

Cross-section	Cable length for use in:
	<ul style="list-style-type: none"> <li>▪ Non-hazardous area</li> <li>▪ Hazardous area: Zone 2; Class I, Division 2</li> <li>▪ Hazardous area: Zone 1; Class I, Division 1</li> </ul>
0.34 mm <sup>2</sup> (22 AWG)	80 m (270 ft)
0.50 mm <sup>2</sup> (20 AWG)	120 m (400 ft)
0.75 mm <sup>2</sup> (18 AWG)	180 m (600 ft)
1.00 mm <sup>2</sup> (17 AWG)	240 m (800 ft)
1.50 mm <sup>2</sup> (15 AWG)	300 m (1 000 ft)

*Optionally available connecting cable*

<b>Standard cable</b>	2 × 2 × 0.34 mm <sup>2</sup> (22 AWG) PVC cable <sup>1)</sup> with common shield (2 pairs, pair-stranded)
<b>Flame resistance</b>	According to DIN EN 60332-1-2
<b>Oil-resistance</b>	According to DIN EN 60811-2-1
<b>Shielding</b>	Tin-plated copper-braid, optical cover ≥ 85 %
<b>Capacitance: core/shield</b>	≤200 pF/m
<b>L/R</b>	≤24 μH/Ω
<b>Available cable length</b>	10 m (35 ft)
<b>Operating temperature</b>	When mounted in a fixed position: -50 to +105 °C (-58 to +221 °F); when cable can move freely: -25 to +105 °C (-13 to +221 °F)

1) UV radiation can impair the cable outer sheath. Protect the cable from direct sunshine where possible.

**Overvoltage protection**

<b>Mains voltage fluctuations</b>	→ ☰ 40
<b>Overvoltage category</b>	Overvoltage category II
<b>Short-term, temporary overvoltage</b>	Between cable and ground up to 1200 V, for max. 5 s
<b>Long-term, temporary overvoltage</b>	Between cable and ground up to 500 V

## Performance characteristics

**Reference operating conditions**

- Error limits based on ISO 11631
  - Water
    - +15 to +45 °C (+59 to +113 °F)
    - 2 to 6 bar (29 to 87 psi)
  - Data as indicated in the calibration protocol
  - Accuracy based on accredited calibration rigs according to ISO 17025
-  To obtain measured errors, use the *Applicator* sizing tool → ☰ 116

**Maximum measurement error**

o.r. = of reading; 1 g/cm<sup>3</sup> = 1 kg/l; T = medium temperature

**Base accuracy**

 Design fundamentals → ☰ 55

*Mass flow and volume flow (liquids)*

- ±0.05 % o.r. (optional)
- ±0.10 % o.r. (standard)

*Mass flow (gases)*

±0.25 % o.r.

*Mass flow (cryogenic liquids and gases under -100 °C (-148 °F))*

±0.35 % o.r. (order code for "Measuring tube material", option LA)

*Density (liquids)*

Standard density

- ±0.2 kg/m<sup>3</sup> ( ±0.0002 g/cm<sup>3</sup> )
- Valid in density range: 0 to 2 000 kg/m<sup>3</sup>

Premium density (DN 25 (1")); order code for "Application package", option EI)

- $\pm 0.1 \text{ kg/m}^3$
- Valid in density range: 0 to 3 000  $\text{kg/m}^3$

For additional information, see the Special Documentation on the advanced density function →  119

For highly accurate density measurement, the pitch and roll angle and pressure compensation must be configured.

For highly accurate density measurement, avoid significant tensile stresses due to the installation and ensure the flow velocity in the nominal diameter is  $> 0.1 \text{ m/s}$  ( $0.33 \text{ ft/s}$ ).

*Density (cryogenic liquids and gases under  $-100 \text{ }^\circ\text{C}$  ( $-148 \text{ }^\circ\text{F}$ ))*

$\pm 0.03 \text{ g/cm}^3$  (order code for "Measuring tube material", option LA)

*Temperature*

$\pm 0.1 \text{ }^\circ\text{C} \pm 0.003 \cdot T \text{ }^\circ\text{C}$  ( $\pm 0.18 \text{ }^\circ\text{F} \pm 0.003 \cdot (T - 32) \text{ }^\circ\text{F}$ )

**Accuracy of outputs**

The outputs have the following base accuracy specifications:

*Current output*

<b>Accuracy</b>	±5 µA
-----------------	-------

*Pulse/frequency output*

o.r. = of reading

<b>Accuracy</b>	Max. ±50 ppm o.r. (over the entire ambient temperature range)
-----------------	---

**Repeatability**

o.r. = of reading; 1 g/cm<sup>3</sup> = 1 kg/l; T = medium temperature

**Base repeatability**

 Design fundamentals → 55

*Mass flow and volume flow (liquids)*

±0.025 % o.r.

*Mass flow (gases)*

±0.20 % o.r.

*Mass flow (cryogenic liquids and gases under -100 °C (-148 °F))*

±0.175 % o.r. (order code for "Measuring tube material", option LA)

*Density (liquids)*

- ±0.1 kg/m<sup>3</sup> / ±0.0001 g/cm<sup>3</sup>
- Premium density: ±0.02 kg/m<sup>3</sup> / ±0.00002 g/cm<sup>3</sup>

*Density (cryogenic liquids and gases under -100 °C (-148 °F))*

±0.015 g/cm<sup>3</sup> (order code for "Measuring tube material", option LA)

*Temperature*

±0.05 °C ± 0.0025 · T °C (±0.09 °F ± 0.0015 · (T-32) °F)

**Response time**

The response time depends on the configuration (damping).

**Influence of ambient temperature**

**Current output**

<b>Temperature coefficient</b>	Max. 1 µA/°C
--------------------------------	--------------

**Pulse/frequency output**

<b>Temperature coefficient</b>	No additional effect. Included in accuracy.
--------------------------------	---

**Influence of medium temperature**

**Mass flow**

o.f.s. = of full scale value

If there is a difference between the temperature at zero adjustment and the process temperature, the additional measurement error of the sensors is typically

DN 25 (1"):  $\pm 0.0001\%$  o.f.s./ $^{\circ}\text{C}$  ( $\pm 0.00005\%$  o.f.s./ $^{\circ}\text{F}$ )

DN 50 to 250 (2 to 10"):  $\pm 0.00015\%$  o.f.s./ $^{\circ}\text{C}$  ( $\pm 0.000075\%$  o.f.s./ $^{\circ}\text{F}$ )

The influence is reduced when the zero adjustment is performed at process temperature.

**Density**

If there is a difference between the density calibration temperature and the process temperature, the measurement error of the sensors is typically  $\pm 0.015\text{ kg/m}^3/^{\circ}\text{C}$  ( $\pm 0.0075\text{ kg/m}^3/^{\circ}\text{F}$ ) outside of  $+20$  to  $+60\text{ }^{\circ}\text{C}$  ( $+68$  to  $+140\text{ }^{\circ}\text{F}$ )

**Premium density (order code for "Application package", option EI)**

If there is a difference between the reference temperature of  $20^{\circ}\text{C}$  and the process temperature, the additional maximum measured error of the sensors is typically

$\pm 0.0025\text{ kg/m}^3/^{\circ}\text{C}$  ( $\pm 0.00139\text{ kg/m}^3/^{\circ}\text{F}$ ) within the temperature calibration range.

Outside the calibrated temperature range, the influence of the process temperature is typically  $\pm 0.005\text{ kg/m}^3/^{\circ}\text{C}$  ( $\pm 0.00278\text{ kg/m}^3/^{\circ}\text{F}$ )

- 1 Standard density
- 2 Premium density

**Temperature**

$\pm 0.005 \cdot T\text{ }^{\circ}\text{C}$  ( $\pm 0.005 \cdot (T - 32)\text{ }^{\circ}\text{F}$ )

**Influence of medium pressure**

The following shows how the process pressure (gauge pressure) affects the accuracy of the mass flow and the density.

o.r. = of reading

It is possible to compensate for the effect by:

- Reading in the current pressure measured value via the current input or a digital input.
- Specifying a fixed value for the pressure in the device parameters.

Operating Instructions → 118.

250	10	-0.0048	-0.000331

1) Premium density

 The values for the influence of medium pressure are based on the density of water.

Design fundamentals

o.r. = of reading, o.f.s. = of full scale value

BaseAccu = base accuracy in % o.r., BaseRepeat = base repeatability in % o.r.

MeasValue = measured value; ZeroPoint = zero point stability

Calculation of the maximum measured error as a function of the flow rate

Flow rate	Maximum measured error in % o.r.
$\geq \frac{\text{ZeroPoint}}{\text{BaseAccu}} \cdot 100$ <small>A0021332</small>	$\pm \text{BaseAccu}$ <small>A0021339</small>
$< \frac{\text{ZeroPoint}}{\text{BaseAccu}} \cdot 100$ <small>A0021333</small>	$\pm \frac{\text{ZeroPoint}}{\text{MeasValue}} \cdot 100$ <small>A0021334</small>

Calculation of the maximum repeatability as a function of the flow rate

Flow rate	Maximum repeatability in % o.r.
$\geq \frac{\frac{1}{2} \cdot \text{ZeroPoint}}{\text{BaseRepeat}} \cdot 100$ <small>A0021335</small>	$\pm \text{BaseRepeat}$ <small>A0021340</small>
$< \frac{\frac{1}{2} \cdot \text{ZeroPoint}}{\text{BaseRepeat}} \cdot 100$ <small>A0021336</small>	$\pm \frac{1}{2} \cdot \frac{\text{ZeroPoint}}{\text{MeasValue}} \cdot 100$ <small>A0021337</small>

**Example of maximum measurement error**

A0028741

$E$  Maximum measurement error in % o.r. (example with PremiumCal)  
 $Q$  Flow rate in % of maximum full scale value

**Installation****Mounting location**

A0028772

To avoid measurement errors caused by gas bubble formation in the measuring tube, avoid the following installation locations in the pipe:

- Highest point of a pipeline
- Directly upstream of a free pipe outlet in a down pipe

**Installation in down pipes**

However, the following installation suggestion allows for installation in an open vertical pipeline. Pipe restrictions or the use of an orifice with a smaller cross-section than the nominal diameter prevent the sensor running empty while measurement is in progress.

A0028773

☑ 13 Installation in a down pipe (e.g. for batching applications)

- 1 Supply tank
- 2 Sensor
- 3 Orifice plate, pipe restriction
- 4 Valve
- 5 Filling container

DN/NPS		Ø orifice plate, pipe restriction	
[mm]	[in]	[mm]	[in]
25	1	14	0.55
50	2	28	1.10
80	3	50	1.97
100	4	65	2.60
150	6	90	3.54
200	8	120	4.72
250	10	150	5.91

**Orientation**

The direction of the arrow on the sensor nameplate helps you to install the sensor according to the flow direction (direction of medium flow through the piping).

Orientation		Recommendation
<b>A</b>	Vertical orientation	 <small>A0015591</small> <input checked="" type="checkbox"/> <input checked="" type="checkbox"/> <sup>1)</sup>
<b>B</b>	Horizontal orientation, transmitter at top	 <small>A0015589</small> <input checked="" type="checkbox"/> <input checked="" type="checkbox"/> <sup>2)</sup> Exception: → ☑ 14, ☑ 58

Orientation		Recommendation
C	Horizontal orientation, transmitter at bottom	 <small>A0015590</small>   <sup>3)</sup> Exception: →  , 
D	Horizontal orientation, transmitter at side	 <small>A0015592</small>   →  <sup>4)</sup>

- 1) This orientation is recommended to ensure self-draining.
- 2) Applications with low process temperatures may reduce the ambient temperature. To maintain the minimum ambient temperature for the transmitter, this orientation is recommended.
- 3) Applications with high process temperatures may increase the ambient temperature. To maintain the maximum ambient temperature for the transmitter, this orientation is recommended.
- 4) Not recommended for inhomogeneous media.

If a sensor is installed horizontally with a curved measuring tube, match the position of the sensor to the medium properties.

 14 Orientation of sensor with curved measuring tube

- 1 Avoid this orientation for media with entrained solids: Risk of solids accumulating
- 2 Avoid this orientation for outgassing media: Risk of gas accumulating

## Inlet and outlet runs

No special precautions need to be taken for fittings that create turbulence, such as valves, elbows or T-pieces, as long as no cavitation occurs → .

## Special installation instructions

### Drainability

When installed vertically, the measuring tubes can be drained completely and protected against buildup.

### Hygienic compatibility

-  When installing in hygienic applications, please refer to the information in the "Certificates and approvals/hygienic compatibility" section → 
- In the case of measuring devices with the order code for "Housing", option B "Stainless, hygienic", to seal the connection compartment cover, screw it closed finger-tight and tighten it by another 45° (corresponds to 15 Nm).

### Rupture disk

Process-related information: → .

### WARNING

#### Danger from medium escaping!

Medium escaping under pressure can cause injury or material damage.

- ▶ Take precautions to prevent danger to persons and damage if the rupture disk is actuated.
- ▶ Observe the information on the rupture disk sticker.
- ▶ Make sure that the function and operation of the rupture disk is not impeded through the installation of the device.
- ▶ Do not use a heating jacket.
- ▶ Do not remove or damage the rupture disk.

The position of the rupture disk is indicated by a sticker affixed beside it.

The transportation guard must be removed.

The existing connecting nozzles are not intended for the purpose of rinsing or pressure monitoring, but instead serve as the mounting location for the rupture disk.

In the event of a failure of the rupture disk, a drain device can be screwed onto the internal thread of the rupture disk in order to drain off any escaping medium.

- 1 Rupture disk label  
 2 Rupture disk with 1/2" NPT internal thread and 1" width across flats  
 3 Transport protection

For information on the dimensions, see the "Mechanical construction" section (accessories).

### Zero point verification and zero adjustment

All measuring instruments are calibrated in accordance with state-of-the-art technology. Calibration takes place under reference conditions → 51. Therefore, a zero adjustment in the field is generally not required.

Experience shows that zero adjustment is advisable only in special cases:

- To achieve maximum measurement accuracy even with low flow rates.
- Under extreme process or operating conditions (e.g. very high process temperatures or very high-viscosity media).
- For gas applications with low pressure.

For information on checking the zero point and performing a zero adjustment, see the Operating Instructions for the device.

**i** To achieve the highest possible measurement accuracy at low flow rates, the installation must protect the sensor from mechanical stress during operation.

### Pitch and roll angles

If the device is used to measure the density of liquids, the pitch and roll angles must be taken into account during installation.

**i** For correct measurement, the pitch angle and roll angle must be determined during commissioning (with a tolerance of  $\pm 10^\circ$ ) and entered in the pitch angle and roll angle parameters.

**📖** For detailed information on density measurement, see the Special Documentation for the device → 119

#### Pitch angle

The technically relevant pitch angle is the angle shaded gray =  $-90$  to  $+90^\circ$ .

Example (blue): Installation of the device with a pitch angle  $\alpha = +30^\circ$

A0040032

15 Side view with flow direction from left to right.

*Roll angle*

The technically relevant roll angle is the angle shaded gray = -180 to +180°.

Example (blue): Installation of the device with a roll angle  $\beta = +45^\circ$

A0040033

16 Top view in flow direction

### Medium temperature range

Standard version	-50 to +205 °C (-58 to +401 °F)	Order code for "Measuring tube mat., wetted surface", option SA, SB
Low-temperature version	-196 to +150 °C (-320 to +302 °F) <b>NOTICE</b> <b>Material fatigue due to excessive temperature difference!</b> ▶ Maximum temperature difference of media used: 300 K	Order code for "Measuring tube mat., wetted surface", option LA

### Dependency of ambient temperature on medium temperature

A0031121

17 Exemplary representation, values in the table below.

$T_a$  Ambient temperature

$T_m$  Medium temperature

A Maximum permitted medium temperature  $T_m$  at  $T_{a,max} = 60\text{ °C}$  (140 °F); higher medium temperatures  $T_m$  require a reduction in the ambient temperature  $T_a$

B Maximum permitted ambient temperature  $T_a$  for the maximum specified medium temperature  $T_m$  of the sensor

**i** Values for devices that are used in the hazardous area:  
Separate Ex documentation (XA) for the device → 118.

Version	Not insulated				Insulated			
	A		B		A		B	
	$T_a$	$T_m$	$T_a$	$T_m$	$T_a$	$T_m$	$T_a$	$T_m$
Standard version	60 °C (140 °F)	205 °C (401 °F)	-	-	60 °C (140 °F)	110 °C (230 °F)	50 °C (122 °F)	205 °C (401 °F)

**Medium density** 0 to 5 000 kg/m<sup>3</sup> (0 to 312 lb/cf)

### Pressure-temperature ratings

The following pressure/temperature diagrams apply to all pressure-bearing parts of the device and not just the process connection. The diagrams show the maximum permissible medium pressure depending on the specific medium temperature.

**i** Pressure-temperature ratings with the +151 to +205 °C (+304 to +401 °F) temperature range are only for measuring instruments with the extended temperature version.

**Flange similar to EN 1092-1 (DIN 2501)**

18 With flange material 1.4404 (F316/F316L)

**Flange similar to ASME B16.5**

19 With flange material 1.4404 (F316/F316L)

**Flange JIS B2220**

A0029639-EN

20 With flange material 1.4404 (F316/F316L)

**Flange DIN 11864-2 Form A**

A0028782-EN

21 With connection material 1.4404 (316/316L)

**Threaded adapter DIN 11851**

A0028794-EN

22 With connection material 1.4404 (316/316L)

DIN 11851 allows for applications up to +140 °C (+284 °F) if suitable sealing materials are used. Please take this into account when selecting seals and counterparts, as these components can limit the pressure and temperature range.

**Threaded adapter ISO 2853**

23 With connection material 1.4404 (316/316L)

**Threaded adapter SMS 1145**

24 With connection material 1.4404 (316/316L)

SMS 1145 allows for applications up to 16 bar (232 psi) if suitable sealing materials are used. Please take this into account when selecting seals and counterparts, as these components can limit the pressure and temperature range.

**Tri-clamp**

The clamp connections are suitable up to a maximum pressure of 16 bar (232 psi). Please observe the operating limits of the clamp and seal used as they can be over 16 bar (232 psi). The clamp and seal are not included in the scope of supply.

**Sensor housing**

The sensor housing is filled with helium and protects the electronics and mechanics inside.

**i** If a measuring tube fails (e.g. due to process characteristics like corrosive or abrasive fluids), the fluid will initially be contained by the sensor housing.

In the event of a tube failure, the pressure level inside the sensor housing will rise according to the operating process pressure. If the user judges that the sensor housing burst pressure does not

provide an adequate safety margin, the device can be fitted with a rupture disk. This prevents excessively high pressure from forming inside the sensor housing. Therefore, the use of a rupture disk is strongly recommended in applications involving high gas pressures, and particularly in applications in which the process pressure is greater than 2/3 of the sensor housing burst pressure.

If there is a need to drain the leaking medium into a discharge device, the sensor should be fitted with a rupture disk. Connect the discharge to the additional threaded connection →  80.

If the sensor is to be purged with gas (gas detection), it should be equipped with purge connections.

 Do not open the purge connections unless the containment can be filled immediately with a dry, inert gas. The use of helium at low pressure is recommended for purging.

Maximum pressure: 0.5 bar (7.3 psi)

### Burst pressure of the sensor housing

The following sensor housing burst pressures are only valid for standard devices and/or devices equipped with closed purge connections (not opened/as delivered).

If a device fitted with purge connections (order code for "Sensor option", option CH "Purge connection") is connected to the purge system, the maximum pressure is determined by the purge system itself or by the device, depending on which component has the lower pressure classification.

If the device is fitted with a rupture disk (order code for "Sensor option", option CA "Rupture disk"), the rupture disk trigger pressure is decisive.

The sensor housing burst pressure refers to a typical internal pressure which is reached prior to mechanical failure of the sensor housing and which was determined during type testing. The corresponding type test declaration can be ordered with the device (order code for "Additional approval", option LN "Sensor housing burst pressure, type test").

DN		Sensor housing burst pressure	
[mm]	[in]	[bar]	[psi]
25	1	220	3 191
50	2	160	2 320
80	3	150	2 175
100	4	120	1 740
150	6	120	1 740
200	8	100	1 450
250	10	100	1 450

For information on the dimensions: see the "Mechanical construction" section →  70

### Rupture disk

To increase the level of safety, a device version with a rupture disk with a trigger pressure of 10 to 15 bar (145 to 217.5 psi) can be used (order code for "Sensor option", option "rupture disk").

For information on the dimensions: see the "Mechanical construction" section (Accessories) →  80

### Internal cleaning

- CIP cleaning
- SIP cleaning

#### Options

- Oil- and grease-free version for wetted parts, without declaration  
Order code for "Service", option HA <sup>1)</sup>
- Oil- and grease-free version for wetted parts as per IEC/TR 60877-2.0 and BOC 50000810-4, with declaration  
Order code for "Service", option HB <sup>1)</sup>

1) Cleaning only refers to the measuring instrument. Any accessories that have been supplied are not cleaned.

**Flow limit**

Select the nominal diameter by optimizing between the required flow range and permissible pressure loss.

- i** For an overview of the full scale values for the measuring range, see the "Measuring range" section → 11
- The minimum recommended full scale value is approx. 1/20 of the maximum full scale value
  - For the most common applications, 20 to 50 % of the maximum full scale value can be considered ideal
  - A low full scale value must be selected for abrasive media (such as liquids with entrained solids): flow velocity < 1 m/s (< 3 ft/s).
- i** To calculate the flow limit, use the *Applicator* sizing tool → 116

**Pressure loss**

**i** To calculate the pressure loss, use the *Applicator* sizing tool → 116

**Static pressure**

It is important that cavitation does not occur, or that gases entrained in the liquids do not outgas. This is prevented by means of a sufficiently high static pressure.

For this reason, the following mounting locations are recommended:

- At the lowest point in a vertical pipe
- Downstream from pumps (no danger of vacuum)

A0028777

**Thermal insulation**

In the case of some fluids, it is important to keep the heat radiated from the sensor to the transmitter to a low level. A wide range of materials can be used for the required insulation.

**NOTICE**

**Electronics overheating on account of thermal insulation!**

- ▶ Recommended orientation: horizontal orientation, transmitter housing pointing downwards.
- ▶ Do not insulate the transmitter housing .
- ▶ Maximum permissible temperature at the lower end of the transmitter housing: 80 °C (176 °F)
- ▶ Thermal insulation with exposed extension neck: We recommend that you do not insulate the extension neck in order to ensure optimum dissipation of heat.

A0034391

25 Thermal insulation with exposed extension neck

**i** Low-temperature version: It is generally not necessary to insulate the transmitter housing . If insulation is provided, the rules that apply are the same as those for thermal insulation.

**Heating**

Some media require suitable measures to avoid loss of heat at the sensor.

**Heating options**

- Electrical heating, e.g. with electric band heaters <sup>2)</sup>
- Via pipes carrying hot water or steam
- Via heating jackets

**NOTICE****Danger of overheating when heating**

- ▶ Ensure that the temperature at the lower end of the transmitter housing does not exceed 80 °C (176 °F).
- ▶ Ensure that sufficient convection takes place at the transmitter neck.
- ▶ When using in potentially explosive atmospheres, observe the information in the device-specific Ex documentation. For detailed information on the temperature tables, see the separate document entitled "Safety Instructions" (XA) for the device.
- ▶ Consider the behavior of the process diagnostics "830 Ambient temperature too high" and "832 Electronics temperature too high" if overheating cannot be avoided by a suitable system design.

**Vibrations**

The operational reliability of the measuring system is not affected by plant vibrations.

---

2) The use of parallel electric band heaters is generally recommended (bidirectional electricity flow). Particular considerations must be made if a single-wire heating cable is to be used. Additional information is provided in the document EA01339D "Installation instructions for electrical trace heating systems" →  120

## Custody transfer

The measuring device is optionally tested in accordance with OIML R117/R81 and has an EU type evaluation certificate which authorizes the use in EU type-examination certificates according to Measuring Instruments Directive 2014/32/EU for service subject to legal metrological control ("custody transfer") for liquids other than water and cryogenic liquids (Annex VII).

The measuring device is optionally tested according to OIML R137 and has an EU type-examination certificate according to Measuring Instruments Directive 2014/32/EU for service subject to legal metrological control ("custody transfer") as a gas meter (Annex IV).

The device is used with a legally controlled totalizer display on the local display and optionally with outputs subject to legal metrological control.

Measuring devices subject to legal metrological control totalize in both directions, i.e. all the outputs consider flow components in the positive (forward) and negative (reverse) flow direction.

Generally a measuring device subject to legal metrological control is secured against tampering by seals on the transmitter or sensor. These seals may normally only be opened by a representative of the competent authority for legal metrology controls.

After putting the device into circulation or after sealing the device, operation is only possible to a limited extent.

Detailed ordering information is available from your local Endress+Hauser sales center for national approvals, which are based on the OIML certificates, for applications with liquids other than water or cryogenic liquids.

More information is provided in the supplementary documentation.

External WLAN antenna

**i** The external WLAN antenna is not suitable for use in hygienic applications.

External WLAN antenna mounted on device

A0028923

35 Unit mm (in)

External WLAN antenna mounted with cable

The external WLAN antenna can be mounted separately from the transmitter if the transmission/reception conditions at the transmitter mounting location are poor.

A0033597

36 Unit mm (in)

**Weight**

All values (weight exclusive of packaging material) refer to devices with EN/DIN PN 40 flanges. Weight specifications including transmitter as per order code for "Housing", option A "Aluminum, coated".

Different values due to different transmitter versions:

- Transmitter version for the hazardous area  
(Order code for "Housing", option A "Aluminum, coated"; Ex d): +2 kg (+4.4 lbs)
- Cast transmitter version, stainless  
(Order code for "Housing", option L "Cast, stainless"): +6 kg (+13 lbs)
- Transmitter version for hygienic area  
(Order code for "Housing", option B "Stainless, hygienic"): +0.2 kg (+0.44 lbs)

**Weight in SI units**

DN [mm]	Weight [kg]
25	11
50	33
80	60
100	149

DN [mm]	Weight [kg]
150	166
200	296
250	483

**Weight in US units**

DN [in]	Weight [lbs]
1	24
2	73
3	132
4	329
6	366
8	653
10	1065

**Materials**

**Transmitter housing**

Order code for "Housing":

- Option **A** "Aluminum, coated": aluminum, AlSi10Mg, coated
- Option **B** "Stainless, hygienic": stainless steel, 1.4404 (316L)
- Option **L** "Cast, stainless": cast, stainless steel, 1.4409 (CF3M) similar to 316L

*Window material*

Order code for "Housing":

- Option **A** "Aluminum, coated": glass
- Option **B** "Stainless, hygienic": polycarbonate
- Option **L** "Cast, stainless": glass

*Seals*

Order code for "Housing":

- Option **B** "Stainless, hygienic": EPDM and silicone

**Cable entries/cable glands**

37 Possible cable entries/cable glands

- 1 Internal thread  $M20 \times 1.5$
- 2 Cable gland  $M20 \times 1.5$
- 3 Adapter for cable entry with internal thread  $G \frac{1}{2}''$  or  $NPT \frac{1}{2}''$
- 4 Device plug

Order code for "Housing", option A "Aluminum, coated"

The various cable entries are suitable for hazardous and non-hazardous areas.

Cable entry/cable gland	Material
Gland M20 × 1.5	Non-Ex: plastic
	Z2, D2, Ex d/de: brass with plastic
Adapter for cable entry with internal thread G ½"	Nickel-plated brass
Adapter for cable entry with internal thread NPT ½"	

Order code for "Housing", option B "Stainless, hygienic"

The various cable entries are suitable for hazardous and non-hazardous areas.

Cable entry/cable gland	Material
Cable gland M20 × 1.5	Plastic
Adapter for cable entry with internal thread G ½"	Nickel-plated brass
Adapter for cable entry with internal thread NPT ½"	

Order code for "Housing", option L "Cast, stainless"

The various cable entries are suitable for hazardous and non-hazardous areas.

Cable entry/cable gland	Material
Cable gland M20 × 1.5	Stainless steel, 1.4404 (316L)
Adapter for cable entry with internal thread G ½"	
Adapter for cable entry with internal thread NPT ½"	

#### Device plug

Electrical connection	Material
Plug M12x1	<ul style="list-style-type: none"> <li>▪ Socket: Stainless steel, 1.4404 (316L)</li> <li>▪ Contact housing: Polyamide</li> <li>▪ Contacts: Gold-plated brass</li> </ul>

#### Sensor housing

- Acid and alkali-resistant outer surface
- Stainless steel, 1.4404 (316L)

#### Measuring tubes

Stainless steel, 1.4404 (316/316L); manifold: stainless steel, 1.4404 (316/316L)

#### Process connections

Flanges similar to EN 1092-1 (DIN 2501) / similar to ASME B16.5 / as per JIS B2220:  
Stainless steel, 1.4404 (F316/F316L)

 Available process connections →  93

#### Seals

Welded process connections without internal seals

**Accessories**

*Protective cover*

Stainless steel, 1.4404 (316L)

*External WLAN antenna*

- Antenna: ASA plastic (acrylonitrile styrene acrylate) and nickel-plated brass
- Adapter: Stainless steel and nickel-plated brass
- Cable: Polyethylene
- Plug: Nickel-plated brass
- Angle bracket: Stainless steel

**Process connections**

Fixed flange connections:

- EN 1092-1 (DIN 2501) flange
- EN 1092-1 (DIN 2512N) flange
- ASME B16.5 flange
- JIS B2220 flange

Process connection materials → 92

**Surface roughness**

All data relate to parts in contact with medium.

*The following surface roughness categories can be ordered:*

Category	Method	Option(s)/Order code "Measuring tube mat., wetted surface"
Not polished	–	SA, LA
$Ra \leq 0.76 \mu\text{m}$ (30 $\mu\text{in}$ ) <sup>1)</sup>	Mechanically polished <sup>2)</sup>	SB
$Ra \leq 0.76 \mu\text{m}$ (30 $\mu\text{in}$ ) <sup>1)</sup>	Mechanically polished <sup>2)</sup> , welds in as-welded condition	SJ

1) Ra according to ISO 21920

2) Inaccessible weld seams between pipe and manifold are excluded

## Operability

### Operation concept

#### Operator-oriented menu structure for user-specific tasks

- Commissioning
- Operation
- Diagnosis
- Expert level

#### Quick and safe commissioning

- Guided menus ("Make-it-run" wizards) for applications
- Menu guidance with brief descriptions of the individual parameter functions
- Access to the device via web server
- WLAN access to the device via mobile handheld terminal, tablet or smart phone

#### Reliable operation

- Operation in local language
- Uniform operating philosophy applied to device and operating tools
- If replacing electronic modules, transfer the device configuration via the integrated memory (HistoROM backup) which contains the process and measuring device data and the event logbook. No need to reconfigure.

#### Efficient diagnostics increase measurement reliability

- Troubleshooting measures can be called up via the device and in the operating tools
- Diverse simulation options, logbook for events that occur and optional line recorder functions

### Languages

Can be operated in the following languages:

- Via local operation  
English, German, French, Spanish, Italian, Dutch, Portuguese, Polish, Russian, Turkish, Chinese, Japanese, Korean, Vietnamese, Czech, Swedish
- Via web browser  
English, German, French, Spanish, Italian, Dutch, Portuguese, Polish, Russian, Turkish, Chinese, Japanese, Vietnamese, Czech, Swedish
- Via "FieldCare", "DeviceCare" operating tool: English, German, French, Spanish, Italian, Chinese, Japanese

### Local operation

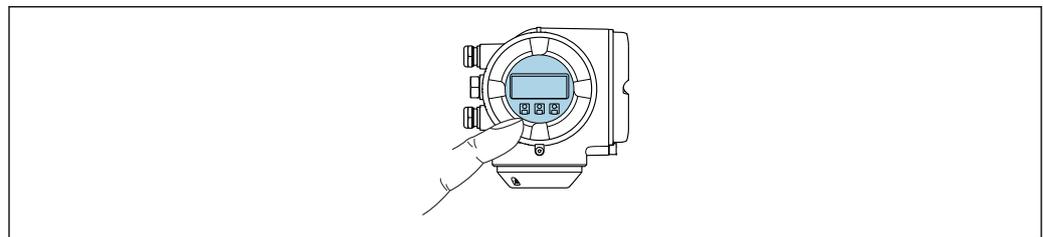

#### Via display module

Equipment level:

- Order code for "Display; operation", option F "4-line, illuminated, graphic display; touch control"
- Order code for "Display; operation", option G "4-line, illuminated, graphic display; touch control + WLAN"

Information about WLAN interface → 102

A0026785

38 Operation with touch control

#### Display elements

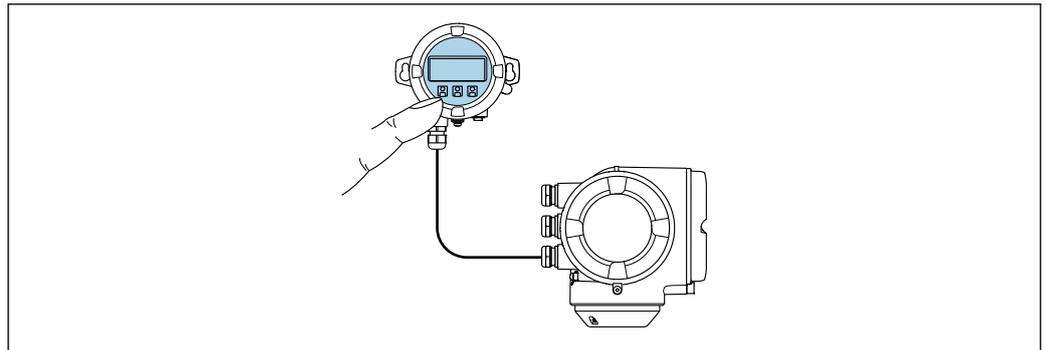

- 4-line, illuminated, graphic display
- White background lighting; switches to red in event of device errors
- Format for displaying measured variables and status variables can be individually configured

#### Operating elements

- External operation via touch control (3 optical keys) without opening the housing: , ,
- Operating elements also accessible in the various zones of the hazardous area

**Via remote display and operating module DKX001**

- i The remote display and operating module DKX001 is available as an optional extra → 114..
  - The remote display and operating module DKX001 is only available for the following housing versions, order code for "Housing":
    - Option A "Aluminum, coated"
    - Option L "Cast, stainless"
  - The measuring instrument is always supplied with a dummy cover when the remote display and operating module DKX001 is ordered directly with the measuring instrument. Display or operation at the transmitter is not possible in this case.
  - If ordered subsequently, the remote display and operating module DKX001 may not be connected at the same time as the existing measuring instrument display module. Only one display or operation unit may be connected to the transmitter at any one time.

A0026786

39 Operation via remote display and operating module DKX001

*Display and operating elements*

The display and operating elements correspond to those of the display module → 94.

*Housing material*

The housing material of the display and operating module DKX001 depends on the choice of transmitter housing material.

Transmitter housing		Remote display and operating module
Order code for "Housing"	Material	Material
Option A "Aluminum, coated"	AlSi10Mg, coated	AlSi10Mg, coated
Option L "Cast, stainless"	Cast stainless steel, 1.4409 (CF3M) similar to 316L	1.4409 (CF3M)

*Cable entry*

Corresponds to the choice of transmitter housing, order code for "Electrical connection".

*Connecting cable*

→ 50

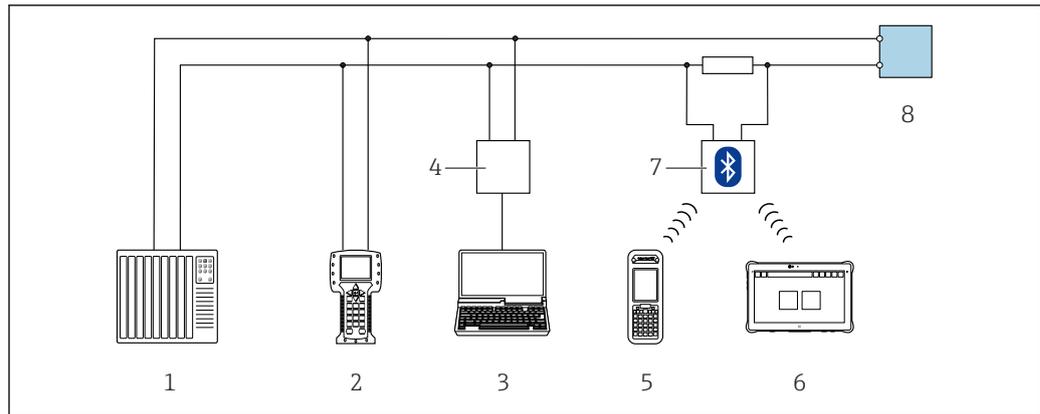

*Dimensions*

→ 81

**Remote operation**

**Via HART protocol**

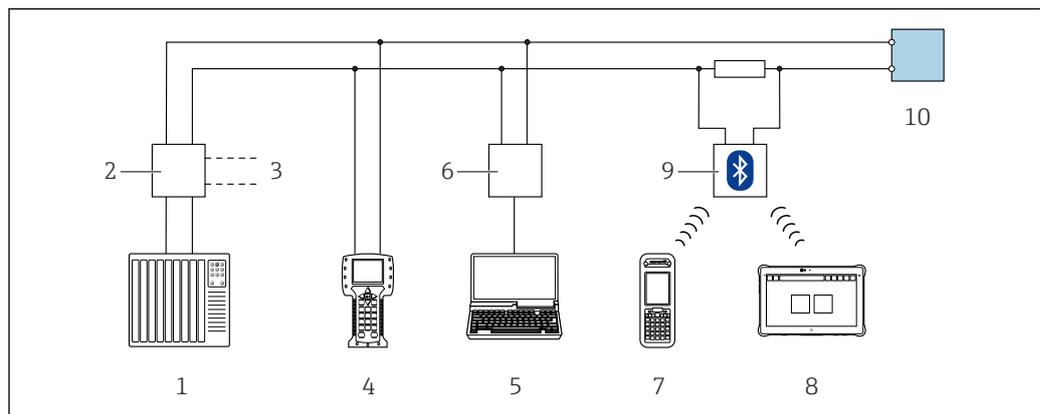

This communication interface is available in device versions with a HART output.

A0028747

40 Options for remote operation via HART protocol (active)

- 1 Automation system (e.g. PLC)
- 2 Field Communicator 475
- 3 Computer with web browser for accessing the integrated device web server or computer with operating tool (e.g. FieldCare, DeviceCare, AMS Device Manager, SIMATIC PDM) with COM DTM "CDI Communication TCP/IP"
- 4 Commubox FXA195 (USB)
- 5 Field Xpert SFX350 or SFX370
- 6 Field Xpert SMT70
- 7 VIATOR Bluetooth modem with connection cable
- 8 Transmitter

A0028746

41 Options for remote operation via HART protocol (passive)

- 1 Automation system (e.g. PLC)
- 2 Transmitter power supply unit, e.g. RN221N (with communication resistor)
- 3 Connection for Commubox FXA195 and Field Communicator 475
- 4 Field Communicator 475
- 5 Computer with web browser for accessing the integrated device web server or computer with operating tool (e.g. FieldCare, DeviceCare, AMS Device Manager, SIMATIC PDM) with COM DTM "CDI Communication TCP/IP"
- 6 Commubox FXA195 (USB)
- 7 Field Xpert SFX350 or SFX370
- 8 Field Xpert SMT70
- 9 VIATOR Bluetooth modem with connection cable
- 10 Transmitter

### Via FOUNDATION Fieldbus network

This communication interface is available in device versions with FOUNDATION Fieldbus.

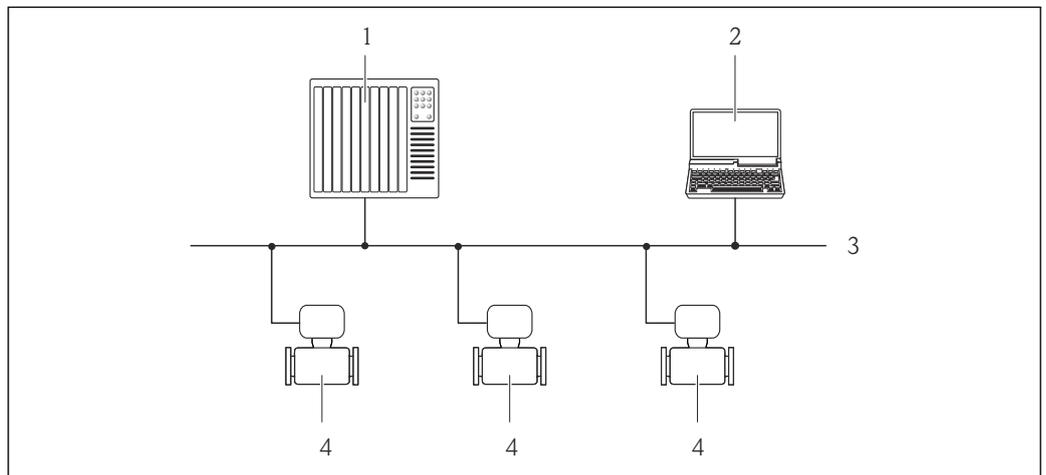

A0028837

42 Options for remote operation via FOUNDATION Fieldbus network

- 1 Automation system
- 2 Computer with FOUNDATION Fieldbus network card
- 3 Industry network
- 4 High Speed Ethernet FF-HSE network
- 5 Segment coupler FF-HSE/FF-H1
- 6 FOUNDATION Fieldbus FF-H1 network
- 7 Power supply FF-H1 network
- 8 T-box
- 9 Measuring instrument

**Via PROFIBUS DP network**

This communication interface is available in device versions with PROFIBUS DP.

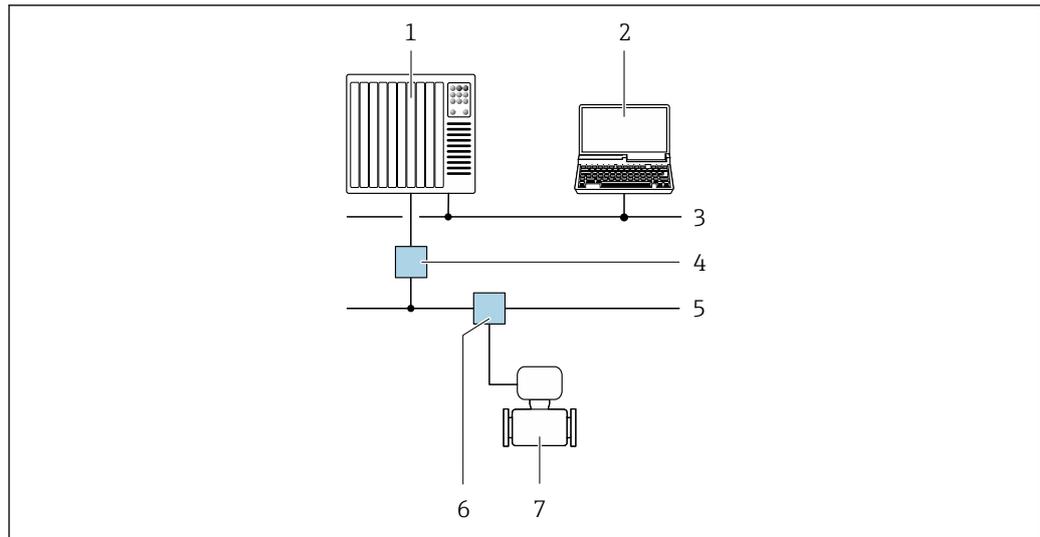

A0020903

43 Options for remote operation via PROFIBUS DP network

- 1 Automation system
- 2 Computer with PROFIBUS network card
- 3 PROFIBUS DP network
- 4 Measuring instrument

**Via PROFIBUS PA network**

This communication interface is available in device versions with PROFIBUS PA.

A0028838

44 Options for remote operation via PROFIBUS PA network

- 1 Automation system
- 2 Computer with PROFIBUS network card
- 3 PROFIBUS DP network
- 4 Segment coupler PROFIBUS DP/PA
- 5 PROFIBUS PA network
- 6 T-box
- 7 Measuring instrument

#### Via Modbus RS485 protocol

This communication interface is available in device versions with a Modbus RS485 output.

A0029437

45 Options for remote operation via Modbus RS485 protocol (active)

- 1 Automation system (e.g. PLC)
- 2 Computer with web browser for accessing the integrated device web server or with operating tool (e.g. FieldCare, DeviceCare) with COM DTM "CDI Communication TCP/IP" or Modbus DTM
- 3 Transmitter

#### Via Modbus TCP over Ethernet-APL 10 Mbit/s, SPE 10 Mbit/s

This communication interface is available on port 1 in device versions with a Modbus TCP over Ethernet-APL output.

A0046117

46 Options for remote operation via Modbus TCP over Ethernet-APL protocol (active)

- 1 Automation system, e.g. Simatic S7 (Siemens)
- 2 Ethernet switch, e.g. Scalance X204 (Siemens)
- 3 Computer with web browser or operating tool
- 4 APL power switch/SPE power switch (optional)
- 5 APL field switch/SPE field switch
- 6 Measuring instrument/communication via port 1 (terminal 26 + 27)

### Via Modbus TCP over Ethernet 100 Mbit/s

This communication interface is available on port 2 in device versions with a Modbus TCP over Ethernet-APL output.

#### Star topology

A0032078

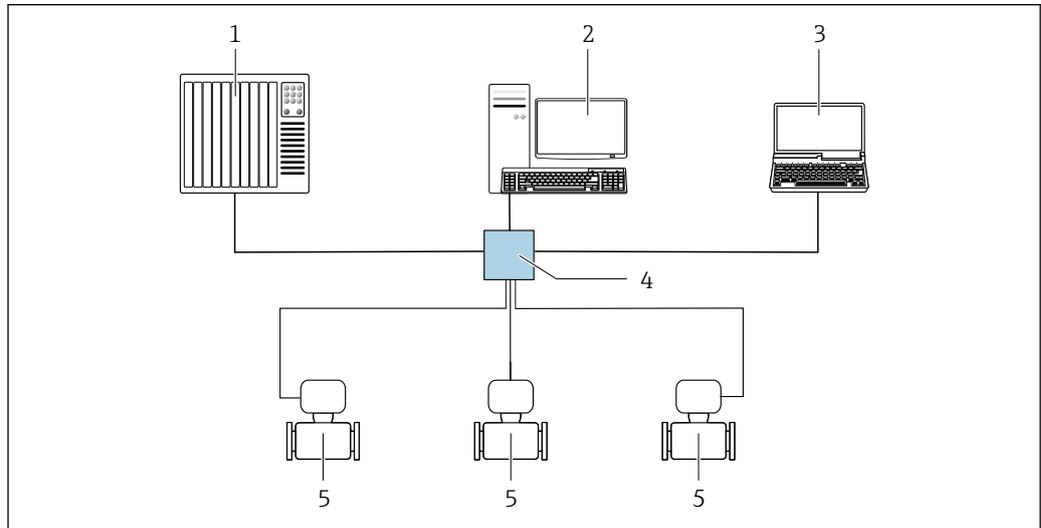

47 Options for remote operation via Modbus TCP over Ethernet - 100 Mbit/s: Star topology

- 1 Automation system, z. B. RSLogix (Rockwell Automation)
- 2 Workstation for measuring instrument operation: with Custom Add-On Profile for "RSLogix 5000" (Rockwell Automation) or with Electronic Data Sheet (EDS)
- 3 Computer with web browser or operating tool
- 4 Standard Ethernet switch, e.g. Stratix (Rockwell Automation)
- 5 Measuring instrument/communication via port 2 (RJ45 connector)

### Via EtherNet/IP network

This communication interface is available in device versions with EtherNet/IP.

#### Star topology

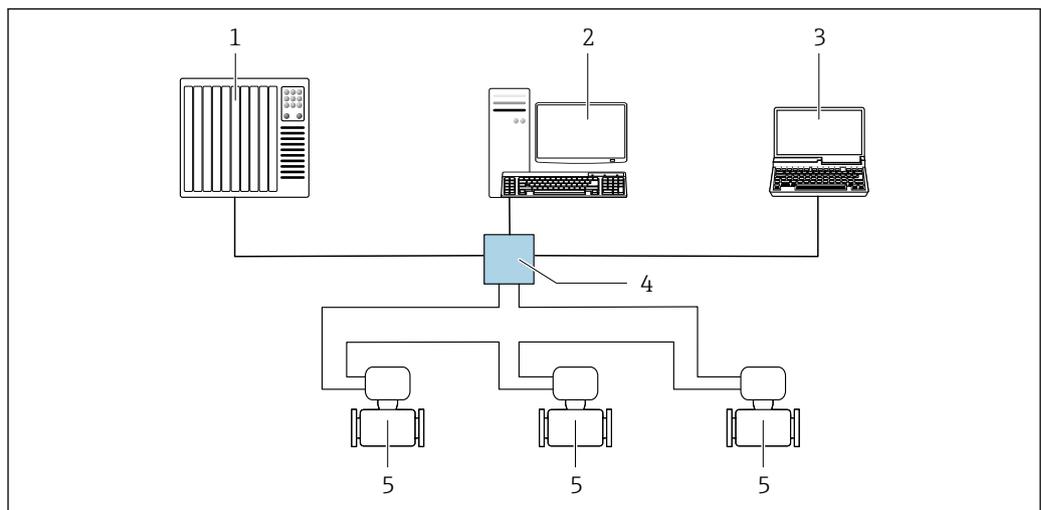

A0032078

48 Options for remote operation via Ethernet/IP network: star topology

- 1 Automation system, z. B. "RSLogix" (Rockwell Automation)
- 2 Workstation for measuring instrument operation: with Custom Add-On Profile for "RSLogix 5000" (Rockwell Automation) or with Electronic Data Sheet (EDS)
- 3 Computer with web browser for accessing the integrated web server or computer with operating tool (e.g. FieldCare, DeviceCare) with COM DTM "CDI Communication TCP/IP"
- 4 Standard Ethernet switch, e.g. Scalance X204 (Siemens)
- 5 Measuring instrument

#### Ring topology

The device is integrated via the terminal connection for signal transmission (output 1) and the service interface (CDI-RJ45).

A0033725

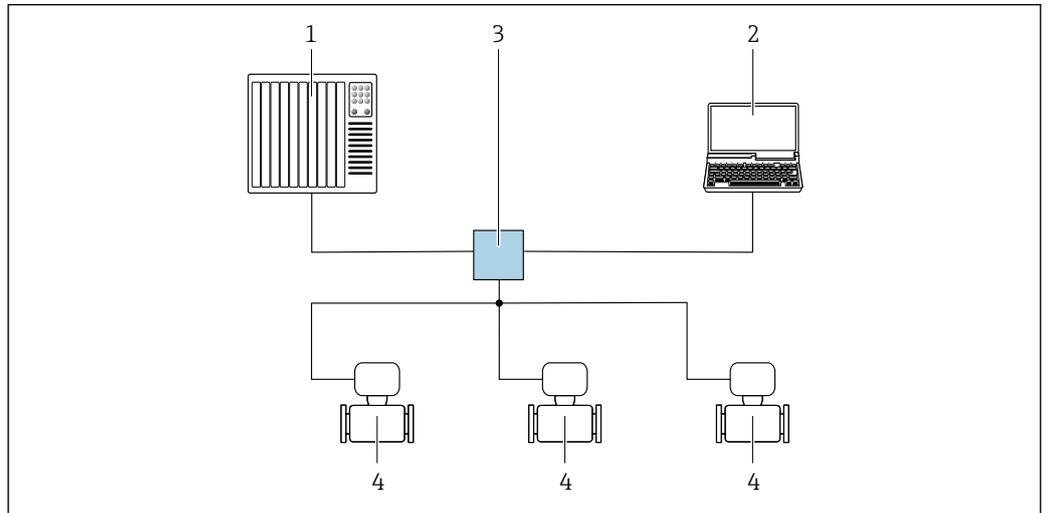

49 Options for remote operation via EtherNet/IP network: ring topology

- 1 Automation system, z. B. "RSLogix" (Rockwell Automation)
- 2 Workstation for measuring instrument operation: with Custom Add-On Profile for RSLogix 5000 (Rockwell Automation) or with Electronic Data Sheet (EDS)
- 3 Computer with web browser for accessing the integrated web server or computer with operating tool (e.g. FieldCare, DeviceCare) with COM DTM "CDI Communication TCP/IP"
- 4 Standard Ethernet switch, e.g. Scalance X204 (Siemens)
- 5 Measuring instrument

**Via PROFINET network**

This communication interface is available in device versions with PROFINET.

*Star topology*

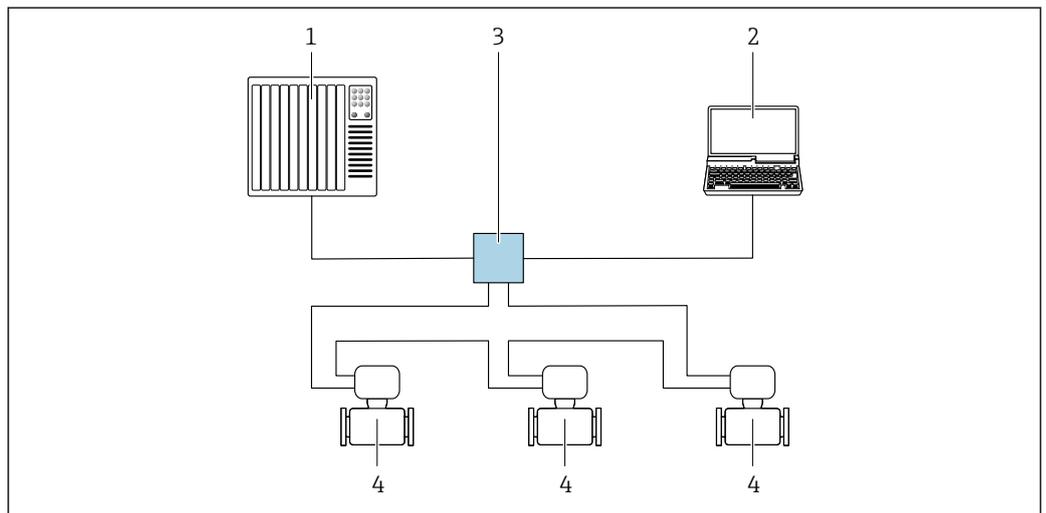

A0026545

50 Options for remote operation via PROFINET network: star topology

- 1 Automation system, e.g. Simatic S7 (Siemens)
- 2 Computer with web browser for accessing integrated web server or computer with operating tool (e.g. FieldCare, DeviceCare, SIMATIC PDM) with COM DTM "CDI Communication TCP/IP"
- 3 Standard Ethernet switch, e.g. Scalance X204 (Siemens)
- 4 Measuring instrument

*Ring topology*

The device is integrated via the terminal connection for signal transmission (output 1) and the service interface (CDI-RJ45).

A0033719

51 Options for remote operation via PROFINET network: ring topology

- 1 Automation system, e.g., Simatic S7 (Siemens)
- 2 Computer with web browser for accessing integrated web server or computer with operating tool (e.g. FieldCare, DeviceCare, SIMATIC PDM) with COM DTM "CDI Communication TCP/IP"
- 3 Standard Ethernet switch, e.g. Scalance X204 (Siemens)
- 4 Measuring instrument

## Service interface

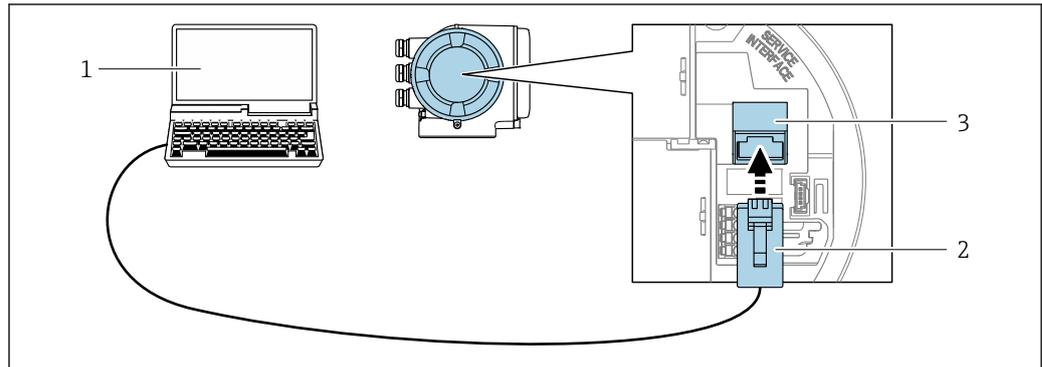

### Via service interface (CDI-RJ45)

To configure the device on site, a point-to-point connection can be established. Alternatively, a connection via Modbus TCP can be used. The connection is made with the housing open, directly via the device's service interface (CDI-RJ45).

**i** An adapter for the RJ45 to the M12 connector is optionally available for the non-hazardous area:

Order code for "Accessories", option **NB**: "Adapter RJ45 M12 (service interface)"

The adapter connects the service interface (CDI-RJ45) to an M12 connector mounted in the cable entry. The connection to the service interface can be established via an M12 connector without opening the device.

A0027563

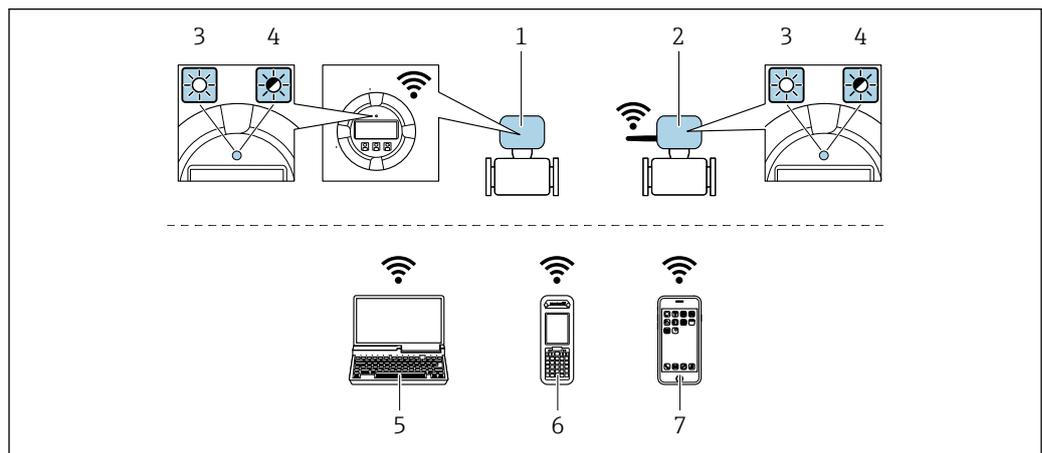

**52** Connection via service interface (CDI-RJ45)

- 1 Computer with web browser for accessing the integrated web server or computer with operating tool, e.g. "FieldCare", "DeviceCare", with COM DTM "CDI Communication TCP/IP" or Modbus DTM or operating tool
- 2 Standard Ethernet connecting cable with RJ45 connector
- 3 Service interface (CDI-RJ45) of the measuring instrument with access to the integrated web server

### Via WLAN interface

The optional WLAN interface is available on the following device version:

Order code for "Display; operation", option G "4-line, illuminated; touch control + WLAN"

A0034570

- 1 Transmitter with integrated WLAN antenna
- 2 Transmitter with external WLAN antenna
- 3 LED lit constantly: WLAN reception is enabled on measuring instrument
- 4 LED flashing: WLAN connection established between operating unit and measuring instrument
- 5 Computer with WLAN interface and web browser for accessing integrated device web server or with operating tool e.g. FieldCare, DeviceCare)
- 6 Mobile handheld terminal with WLAN interface and web browser for accessing integrated device web server or operating tool (e.g. FieldCare, DeviceCare)
- 7 Smartphone or tablet (e.g. Field Xpert SMT70)

Function	WLAN: IEEE 802.11 b/g (2.4 GHz) <ul style="list-style-type: none"> <li>▪ Access point with DHCP server (factory setting)</li> <li>▪ Network</li> </ul>
Encryption	WPA2-PSK AES-128 (in accordance with IEEE 802.11i)
Configurable WLAN channels	1 to 11
Degree of protection	IP66/67
Available antennas	<ul style="list-style-type: none"> <li>▪ Internal antenna</li> <li>▪ External antenna (optional) In the event of poor transmission/reception conditions at the place of installation. Available as an accessory .</li> </ul> <p> Only 1 antenna is active at any one time!</p>
Range	<ul style="list-style-type: none"> <li>▪ Internal antenna: typically 10 m (32 ft)</li> <li>▪ External antenna: typically 50 m (164 ft)</li> </ul>
Materials (external antenna)	<ul style="list-style-type: none"> <li>▪ Antenna: ASA plastic (acrylonitrile styrene acrylate) and nickel-plated brass</li> <li>▪ Adapter: Stainless steel and nickel-plated brass</li> <li>▪ Cable: Polyethylene</li> <li>▪ Plug: Nickel-plated brass</li> <li>▪ Angle bracket: Stainless steel</li> </ul>

**Network integration**

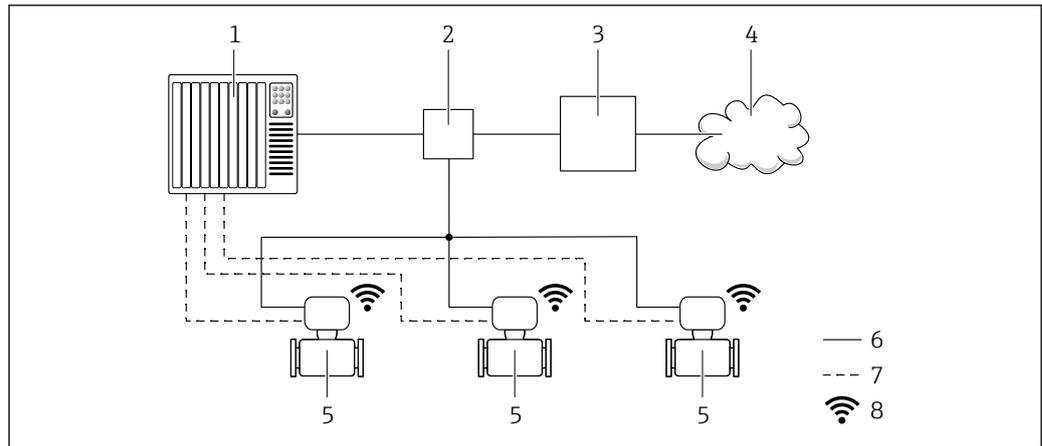

Network integration is only available for the HART communication protocol.

With the optional "OPC UA Server" application package, the device can be integrated into an Ethernet network via the service interface (CDI-RJ45 and WLAN) and communicate with OPC UA clients. If the device is used in this way, IT security must be considered.

For detailed information on connecting transmitters with an Ex de approval, see separate document "Safety instructions" (XA) for the device.

For permanent access to device data and for device configuration via the web server, the device is incorporated directly in a network via the service interface (CDI-RJ45). In this way, the device can be accessed any time from the control station. The measured values are processed separately via the inputs and outputs through the automation system.

A0033618

- 1 Automation system, e.g. Simatic S7 (Siemens)
- 2 Ethernet switch
- 3 Edge Gateway
- 4 Cloud
- 5 Measuring instrument
- 6 Ethernet network
- 7 Measured values via inputs and outputs
- 8 Optional WLAN interface

**i** The optional WLAN interface is available on the following device version:  
Order code for "Display; operation", option **G** "4-line, backlit, graphic display; touch control + WLAN"

**b** Special Documentation for the OPC UA Server application package → **119**.

**Supported operating tools**

Different operating tools can be used for local or remote access to the measuring device. Depending on the operating tool used, access is possible with different operating units and via a variety of interfaces.

Supported operating tools	Operating unit	Interface	Additional information
Web browser	Notebook, PC or tablet with web browser	<ul style="list-style-type: none"> <li>▪ Service interface CDI-RJ45</li> <li>▪ WLAN interface</li> <li>▪ Ethernet-based fieldbus (EtherNet/IP, PROFINET, Modbus TCP over Ethernet-APL)</li> </ul>	Special Documentation for device → <b>119</b>
DeviceCare SFE100	Notebook, PC or tablet with Microsoft Windows system	<ul style="list-style-type: none"> <li>▪ Service interface CDI-RJ45</li> <li>▪ WLAN interface</li> <li>▪ Fieldbus protocol</li> <li>▪ Modbus TCP over Ethernet-APL</li> </ul>	→ <b>116</b>

Supported operating tools	Operating unit	Interface	Additional information
FieldCare SFE500	Notebook, PC or tablet with Microsoft Windows system	<ul style="list-style-type: none"> <li>■ Service interface CDI-RJ45</li> <li>■ WLAN interface</li> <li>■ Fieldbus protocol</li> </ul>	→  116
Field Xpert	SMT70/77/50	<ul style="list-style-type: none"> <li>■ All fieldbus protocols</li> <li>■ WLAN interface</li> <li>■ Bluetooth</li> <li>■ Service interface CDI-RJ45</li> </ul>	Operating Instructions BA01202S Device description files: Use update function of handheld terminal

 Other operating tools based on FDT technology with a device driver such as DTM/iDTM or DD/EDD can be used for device operation. These operating tools are available from the individual manufacturers. Integration into the following operating tools, among others, is supported:

- FactoryTalk AssetCentre (FTAC) from Rockwell Automation → [www.rockwellautomation.com](http://www.rockwellautomation.com)
- Process Device Manager (PDM) from Siemens → [www.siemens.com](http://www.siemens.com)
- Asset Management Solutions (AMS) from Emerson → [www.emersonprocess.com](http://www.emersonprocess.com)
- FieldCommunicator 375/475 from Emerson → [www.emersonprocess.com](http://www.emersonprocess.com)
- Emersons TREX → [www.emerson.com](http://www.emerson.com)
- Field Device Manager (FDM) from Honeywell → [www.process.honeywell.com](http://www.process.honeywell.com)
- FieldMate from Yokogawa → [www.yokogawa.com](http://www.yokogawa.com)
- PACTWare → [www.pactware.com](http://www.pactware.com)

The related device description files are available: [www.endress.com](http://www.endress.com) → Download Area

### Web server

The integrated web server can be used to operate and configure the device via a web browser via Ethernet-APL, via service interface (CDI-RJ45) or via WLAN interface. The structure of the operating menu is the same as for the local display. In addition to the measured values, status information on the device is displayed and can be used to monitor device health. Furthermore the device data can be managed and the network parameters can be configured.

A device that has a WLAN interface (can be ordered as an option) is required for the WLAN connection: order code for "Display; Operation", option G "4-line, illuminated; touch control + WLAN". The device acts as an Access Point and enables communication by computer or a mobile handheld terminal.

### Supported functions

Data exchange between the operating unit (such as a notebook, for example,) and measuring instrument:

- Upload the configuration from the measuring instrument (XML format, configuration backup)
- Save the configuration to the measuring instrument (XML format, restore configuration)
- Export event list (.csv file)
- Export parameter settings (.csv file or PDF file, document the measuring point configuration)
- Export the Heartbeat Technology verification report (PDF file, only available with the **Heartbeat Verification** →  112 application package)
- Flash firmware version for device firmware upgrade, for example
- Download driver for system integration
- Visualize up to 1000 saved measured values (only available with the **Extended HistoROM** application package →  112)

### HistoROM data management

The measuring instrument features HistoROM data management. HistoROM data management comprises both the storage and import/export of key device and process data, making operation and servicing far more reliable, secure and efficient.

 When the device is delivered, the factory settings of the configuration data are stored as a backup in the device memory. This memory can be overwritten with an updated data record, for example after commissioning.

### Additional information on the data storage concept

There are different types of data storage units in which device data are stored and used by the device:

	HistoROM backup	T-DAT	S-DAT
<b>Available data</b>	<ul style="list-style-type: none"> <li>▪ Event logbook, e.g. diagnostic events</li> <li>▪ Parameter data record backup</li> <li>▪ Device firmware package</li> <li>▪ Driver for system integration for exporting via web server, e.g.:               <ul style="list-style-type: none"> <li>▪ GSD for PROFIBUS DP</li> <li>▪ GSD for PROFIBUS PA</li> <li>▪ GSD for PROFINET</li> <li>▪ EDS for EtherNet/IP</li> <li>▪ DD for FOUNDATION Fieldbus</li> </ul> </li> </ul>	<ul style="list-style-type: none"> <li>▪ Measured value logging ("Extended HistoROM" order option)</li> <li>▪ Current parameter data record (used by firmware at run time)</li> <li>▪ Indicator (minimum/maximum values)</li> <li>▪ Totalizer value</li> </ul>	<ul style="list-style-type: none"> <li>▪ Sensor data: e.g. nominal diameter</li> <li>▪ Serial number</li> <li>▪ Calibration data</li> <li>▪ Device configuration (e.g. SW options, fixed I/O or multi I/O)</li> </ul>
<b>Storage location</b>	Fixed on the user interface PC board in the connection compartment	Can be plugged into the user interface PC board in the connection compartment	In the sensor plug in the transmitter neck part

#### Data backup

##### Automatic

- The most important device data (sensor and transmitter) are automatically saved in the DAT modules
- If the transmitter or measuring device is replaced: once the T-DAT containing the previous device data has been exchanged, the new measuring device is ready for operation again immediately without any errors
- If exchanging the electronics module (e.g. I/O electronics module): Once the electronics module has been replaced, the software of the module is compared against the current device firmware. The module software is upgraded or downgraded where necessary. The electronics module is available for use immediately afterwards and no compatibility problems occur.

##### Manual

Additional parameter data record (complete parameter settings) in the integrated device memory HistoROM backup for:

- Data backup function  
Backup and subsequent restoration of a device configuration in the device memory HistoROM backup
- Data comparison function  
Comparison of the current device configuration with the device configuration saved in the device memory HistoROM backup

#### Data transmission

##### Manual

- Transfer of a device configuration to another device using the export function of the specific operating tool, e.g. with FieldCare, DeviceCare or web server: to duplicate the configuration or to store in an archive (e.g. for backup purposes)
- Transmission of the drivers for system integration via web server, e.g.:
  - GSD for PROFIBUS DP
  - GSD for PROFIBUS PA
  - GSD for PROFINET
  - EDS for Ethernet/IP
  - DD for FOUNDATION fieldbus

#### Event list

##### Automatic

- Chronological display of up to 20 event messages in the events list
- If the **Extended HistoROM** application package (order option) is enabled: up to 100 event messages are displayed in the events list along with a time stamp, plain text description and remedial measures
- The events list can be exported and displayed via a variety of interfaces and operating tools e.g. DeviceCare, FieldCare or Web server

**Data logging****Manual**

If the **Extended HistoROM** application package (order option) is enabled:

- Recording of 1 to 4 channels of up to 1 000 measured values (up to 250 measured values per channel)
- User configurable recording interval
- Export the measured value log via a variety of interfaces and operating tools e.g. FieldCare, DeviceCare or web server

## Certificates and approvals

Current certificates and approvals for the product are available at [www.endress.com](http://www.endress.com) on the relevant product page:

1. Select the product using the filters and search field.
2. Open the product page.
3. Select **Downloads**.

---

**CE mark**

The device meets the legal requirements of the applicable EU Directives. These are listed in the corresponding EU Declaration of Conformity along with the standards applied.

Endress+Hauser confirms successful testing of the device by affixing to it the CE mark.

---

**UKCA marking**

The device meets the legal requirements of the applicable UK regulations (Statutory Instruments). These are listed in the UKCA Declaration of Conformity along with the designated standards. By selecting the order option for UKCA marking, Endress+Hauser confirms a successful evaluation and testing of the device by affixing the UKCA mark.

Contact address Endress+Hauser UK:

Endress+Hauser Ltd.  
Floats Road  
Manchester M23 9NF  
United Kingdom  
[www.uk.endress.com](http://www.uk.endress.com)

---

**RCM marking**

The measuring system meets the EMC requirements of the "Australian Communications and Media Authority (ACMA)".

---

**Ex approval**

The measuring device is certified for use in hazardous areas and the relevant safety instructions are provided in the separate "Safety Instructions" (XA) document. Reference is made to this document on the nameplate.

Devices with the order code for "Approval; transmitter + sensor", option BA, BB, BC or BD have equipment protection level (EPL) Ga/Gb (Zone 0 in the measuring tube).

-  The separate Ex documentation (XA) containing all the relevant explosion protection data is available from your Endress+Hauser sales center.

**Hygienic compatibility**

- 3-A approval
  - Only measuring instruments with the order code for "Additional approval", option LP "3A" have 3-A approval.
  - The 3-A approval refers to the measuring instrument.
  - When installing the measuring instrument, ensure that no liquid can accumulate on the outside of the measuring instrument.  
A remote display module must be installed in accordance with the 3-A Standard.
  - Accessories (e.g. heating jacket, weather protection cover, wall holder unit) must be installed in accordance with the 3-A Standard.  
Each accessory can be cleaned. Disassembly may be necessary under certain circumstances.
- EHEDG-tested (Type EL Class I)  
Only devices with the order code for "Additional approval", option LT "EHEDG" have been tested and meet the requirements of the EHEDG.  
To meet the requirements for EHEDG certification, the device must be used with process connections in accordance with the EHEDG position paper entitled "Easy cleanable Pipe couplings and Process connections" ([www.ehedg.org](http://www.ehedg.org)).  
To meet the requirements for EHEDG certification, the orientation of the device must ensure drainability.  
Test criteria for cleanability according to EHEDG is a flow velocity of 1.5 m/s in the process line. This speed must be ensured for EHEDG-compliant cleaning.
- FDA CFR 21
- Food Contact Materials Regulation (EC) 1935/2004
- Food Contact Materials Regulation GB 4806
- The requirements of the Food Contact Material regulations must be observed when selecting the material versions.

Observe special installation instructions

**Pharmaceutical compatibility**

- FDA 21 CFR 177
- USP <87>
- USP <88> Class VI 121 °C
- TSE/BSE Certificate of Suitability
- cGMP  
Devices with the order code for "Test, certificate", option JG "Conformity with cGMP-derived requirements, declaration" comply with the requirements of cGMP with regard to the surfaces of parts in contact with the medium, design, FDA 21 CFR material conformity, USP Class VI tests and TSE/BSE conformity.  
A serial number-specific declaration is generated.

**Functional safety**

The measuring instrument can be used for flow monitoring systems (min., max., range) up to SIL 2 (single-channel architecture; order code for "Additional approval", option LA) and SIL 3 (multi-channel architecture with homogeneous redundancy) and is independently evaluated and certified in accordance with IEC 61508.

The following types of monitoring in safety equipment are possible:

- Mass flow
- Volume flow
- Density

Functional safety manual with information for the SIL device → 118

**HART certification****HART interface**

The measuring device is certified and registered by the FieldComm Group. The measuring system meets all the requirements of the following specifications:

- Certified according to HART 7
- The device can also be operated with certified devices of other manufacturers (interoperability)

**FOUNDATION Fieldbus certification**

**FOUNDATION Fieldbus interface**

The measuring device is certified and registered by the FieldComm Group. The measuring system meets all the requirements of the following specifications:

- Certified in accordance with FOUNDATION Fieldbus H1
- Interoperability Test Kit (ITK), revision version 6.2.0 (certificate available on request)
- Physical Layer Conformance Test
- The device can also be operated with certified devices of other manufacturers (interoperability)

**Certification PROFIBUS**

**PROFIBUS interface**

The measuring device is certified and registered by the PNO (PROFIBUS Nutzerorganisation e.V./ PROFIBUS User Organization). The measuring system meets all the requirements of the following specifications:

- Certified according to PA Profile 3.02
- The device can also be operated with certified devices of other manufacturers (interoperability)

**EtherNet/IP certification**

The measuring device is certified and registered by the ODVA (Open Device Vendor Association). The measuring system meets all the requirements of the following specifications:

- Certified in accordance with the ODVA Conformance Test
- EtherNet/IP Performance Test
- EtherNet/IP PlugFest compliance
- The device can also be operated with certified devices of other manufacturers (interoperability)

**Certification PROFINET**

**PROFINET interface**

The measuring instrument is certified and registered by the PROFIBUS Nutzerorganisation e.V. (PNO). The measuring system meets all the requirements of the following specifications:

- Certified according to:
  - Test specification for PROFINET devices
  - PROFINET Netload Class 2 100 Mbit/s
- The device can also be operated with certified devices of other manufacturers (interoperability).
- The device supports PROFINET S2 system redundancy.

**PROFINET over Ethernet-APL certification**

**PROFINET interface**

The measuring instrument is certified and registered by the PROFIBUS Nutzerorganisation e.V. (PNO). The measuring system meets all the requirements of the following specifications:

- Certified according to:
  - Test specification for PROFINET devices
  - PROFINET PA Profile 4.02
  - PROFINET Netload Robustness Class 2 10 Mbit/s
  - APL conformance test
- The device can also be operated with certified devices of other manufacturers (interoperability)
- The device supports PROFINET S2 system redundancy.

**Pressure Equipment Directive**

The measuring instruments can be ordered with or without PED or PESR. If a device with PED or PESR is required, this must be ordered explicitly. For devices with nominal diameters less than or equal to DN 25 (NPS 1"), this is neither possible nor necessary. A UK order option must be selected for PESR under the order code for "Approvals".

- With the marking
  - a) PED/G1/x (x = category) or
  - b) PESR/G1/x (x = category)
 on the sensor nameplate, Endress+Hauser confirms compliance with the "Essential Safety Requirements"
  - a) specified in Annex I of the Pressure Equipment Directive 2014/68/EU or
  - b) Schedule 2 of Statutory Instruments 2016 No. 1105.
- Devices bearing this marking (PED or PESR) are suitable for the following types of medium:
  - Media in Group 1 and 2 with a vapor pressure greater than, or smaller and equal to 0.5 bar (7.3 psi)
  - Unstable gases
- Devices not bearing this marking (without PED or PESR) are designed and manufactured according to sound engineering practice. They meet the requirements of
  - a) Art. 4, Section 3 of the Pressure Equipment Directive 2014/68/EU or
  - b) Part 1, Section 8 of Statutory Instruments 2016 No. 1105.
 The scope of application is indicated
  - a) in diagrams 6 to 9 in Annex II of the Pressure Equipment Directive 2014/68/EU or
  - b) in Schedule 3, Section 2 of Statutory Instruments 2016 No. 1105.

**Radio approval**

The measuring instrument has radio approval.

For detailed information on the radio approval, see the Special Documentation → 119

**Measuring instrument approval**

The measuring instrument is approved as a component in measuring systems (MI-005) in service subject to legal metrological control in accordance with the European Measuring Instruments Directive 2014/32/EU (MID).

The measuring instrument is qualified to OIML R117 and has an OIML Certificate of Conformity (optional).

**Additional certification****Marine approval**

Currently valid certificates are available:

- In the Downloads area of the Endress+Hauser website: [www.endress.com](http://www.endress.com) → Downloads
- Specify the following details:
  - Product root, e.g. 8E3B
  - Search: Approval & Certificates → Marine

**CRN approval**

Some device versions have CRN approval. A CRN-approved process connection with a CSA approval must be ordered for a CRN-approved device.

**Tests and certificates**

- ISO 23277 ZG2x (PT) + ISO 10675-1 ZG1 (RT) measuring tube (PT) + process connection (RT) welded seam, test report
- Penetrant+Radiographic testing ASME B31.3 NFS (RT) measuring tube (PT) + process connection (RT) welded seam, test report
- Penetrant+Radiographic testing ASME VIII Div.1 (RT) measuring tube (PT) + process connection (RT) welded seam, test report
- Visual+Penetrant+Radiographic testing NORSOK M-601 (RT) measuring tube (VT+PT) + process connection. (VT + RT) welded seam, test report
- ISO 23277 ZG2x (PT) + ISO 10675-1 ZG1 (DR) measuring tube (PT) + process connection (DR) welded seam, test report
- Penetrant+Radiographic testing ASME B31.3 NFS (DR) measuring tube (PT) + process connection (DR) welded seam, test report
- Penetrant+Radiographic testing ASME VIII Div.1 (DR) measuring tube (PT) + process connection (DR) welded seam, test report
- Visual+Penetrant+Radiographic testing NORSOK M-601 (DR) measuring tube (VT+PT) + process conn. (VT+DR) welded seam, test report
- EN10204-3.1 material certificate, wetted parts
- Pressure test, internal process, test report (order code for "Test, certificate", option JB)
- Surface roughness test ISO4287/Ra, (wetted parts), test report (option JE)
- Material identification check (PMI), internal procedure, wetted parts, test report (option JK)
- Compliance with requirements derived from cGMP, Declaration (option JG)

Testing of welded connections

Option	Test standard				Component	
	ISO 23277 AL2x (PT) ISO 10675-1 AL1 (RT, DR)	ASME B31.3 NFS	ASME VIII Div.1 Appx. 4+8	NORSOK M-601	Measuring tube	Test procedure

## Ordering information

Detailed ordering information is available from your nearest sales organization [www.addresses.endress.com](http://www.addresses.endress.com) or in the Product Configurator at [www.endress.com](http://www.endress.com):

1. Select the product using the filters and search field.
2. Open the product page.
3. Select **Configuration**.

### Product Configurator - the tool for individual product configuration

- Up-to-the-minute configuration data
- Depending on the device: direct input of information specific to the measuring point, such as the measuring range or operating language
- Automatic verification of exclusion criteria
- Automatic creation of the order code and its breakdown in PDF or Excel output format
- Ability to order directly in the Endress+Hauser Online Shop

## Application packages

Many different application packages are available to enhance the functionality of the device. Such packages might be needed to address safety aspects or specific application requirements.

The application packages can be ordered with the device or subsequently from Endress+Hauser. Detailed information on the order code in question is available from your local Endress+Hauser sales center or on the product page of the Endress+Hauser website: [www.endress.com](http://www.endress.com).

Detailed information on the application packages:  
Special Documentation → 118

---

### Diagnostic functionality

Order code for "Application package", option EA "Extended HistoROM"

Comprises extended functions concerning the event log and the activation of the measured value memory.

Event log:

Memory volume is extended from 20 message entries (standard version) to up to 100 entries.

Data logging (line recorder):

- Memory capacity for up to 1000 measured values is activated.
- 250 measured values can be output via each of the 4 memory channels. The recording interval can be defined and configured by the user.
- Measured value logs can be accessed via the local display or operating tool e.g. FieldCare, DeviceCare or Web server.

For detailed information, see the Operating Instructions for the device.

---

### Heartbeat Technology

Order code for "Application package", option EB "Heartbeat Verification + Monitoring"

#### Heartbeat Verification

Meets the requirement for traceable verification in accordance with DIN ISO 9001:2015 Clause 7.6 a) "Control of monitoring and measuring equipment".

- Functional testing in the installed state without interrupting the process.
- Traceable verification results on request, including a report.
- Simple testing process via local operation or other operating interfaces.
- Clear measuring point assessment (pass/fail) with high total test coverage within the framework of manufacturer specifications.
- Extension of calibration intervals according to operator's risk evaluation.

### Heartbeat Monitoring

Continuously supplies data, which are characteristic of the measuring principle, to an external condition monitoring system for the purpose of preventive maintenance or process analysis. These data enable the operator to:

- Draw conclusions - using these data and other information - about the impact the process influences (e.g. corrosion, abrasion, deposit buildup etc.) have on measuring performance over time.
- Schedule servicing in time.
- Monitor the process or product quality, e.g. gas pockets.

 Detailed information on Heartbeat Technology:  
Special Documentation →  118

### Concentration measurement

Order code for "Application package", option ED "Concentration"

Calculation and outputting of fluid concentrations.

The measured density is converted to the concentration of a substance of a binary mixture using the "Concentration" application package:

- Choice of predefined fluids (e.g. various sugar solutions, acids, alkalis, salts, ethanol etc.).
- Common or user-defined units (°Brix, °Plato, % mass, % volume, mol/l etc.) for standard applications.
- Concentration calculation from user-defined tables.

 For detailed information, see the Special Documentation for the device.

### Hydrocarbon viscosity trend

Order code for "Application package", option EK "Monitoring of hydrocarbon viscosity"

Monitoring of viscosity and quality properties in changing process conditions. Suitable for hydrocarbons, such as diesel.

The following viscosity measurements are performed:

- Dynamic viscosity
- Kinematic viscosity
- Temperature-compensated viscosity (kinematic and dynamic) in relation to the reference temperature

 For detailed information, see the Special Documentation for the device.

### Advanced density function

Order code for "Application package", option EH "Advanced density function"

Advanced software functions for density measurement:

- Easy integration into existing density applications with integrated time period signal (TPS).
- Two density values shown simultaneously on the local display.
- Advanced density coefficients for optimum recalibrations.

 For detailed information, see the Special Documentation for the device.

### Premium density and extended density function

Order code for "Application package", option EI "Premium density, +/- 0.1 kg/m<sup>3</sup> + extended density function"

Highest density measurement accuracy thanks to premium density calibration and extended software functions for density measurement:

- Easy integration into existing density applications with integrated time period signal (TPS).
- Two density values shown simultaneously on the local display.
- Advanced density coefficients for optimum recalibrations.

 For detailed information, see the Special Documentation for the device.

### Petroleum

Order code for "Application package", option EJ "Petroleum"

The most important parameters for the Oil & Gas Industry can be calculated and displayed with this application package.

- Corrected volume flow and calculated reference density in accordance with the "API Manual of Petroleum Measurement Standards, Chapter 11.1"
- Water content, based on density measurement
- Weighted mean of the density and temperature

For detailed information, see the Special Documentation for the device.

**Petroleum & locking function**

Order code for "Application package", option EM "Petroleum & locking function"

The most important parameters for the Oil & Gas Industry can be calculated and displayed with this application package. It is also possible to lock the settings.

- Corrected volume flow and calculated reference density in accordance with the "API Manual of Petroleum Measurement Standards, Chapter 11.1"
- Water content, based on density measurement
- Weighted mean of the density and temperature

For detailed information, see the Special Documentation for the device.

**OPC-UA Server**

Order code for "Application package", option EL "OPC-UA Server"

The application package provides an integrated OPC-UA server for comprehensive device services for IoT and SCADA applications.

For detailed information, see the Special Documentation for the device.

## Accessories

Various accessories, which can be ordered with the device or subsequently from Endress+Hauser, are available for the device. Detailed information on the order code in question is available from your local Endress+Hauser sales center or on the product page of the Endress+Hauser website: [www.endress.com](http://www.endress.com).

**Device-specific accessories**

**For the transmitter**

Accessory	Description
Proline 300 transmitter	<p>Transmitter for replacement or storage. Use the order code to define the following specifications:</p> <ul style="list-style-type: none"> <li>■ Approvals</li> <li>■ Output</li> <li>■ Input</li> <li>■ Display/operation</li> <li>■ Housing</li> <li>■ Software</li> </ul> <p> Order code: 8X3BXX</p> <p> Installation Instructions EA01200D</p>

<p>Remote display and operating module DKX001</p>	<ul style="list-style-type: none"> <li>▪ If ordered directly with the measuring instrument: Order code for "Display; operation", option O "Remote display 4-line, illuminated; 10 m (30 ft) cable; touch control"</li> <li>▪ If ordered separately: <ul style="list-style-type: none"> <li>▪ Measuring instrument: order code for "Display; operation", option M "W/o, prepared for remote display"</li> <li>▪ DKX001: Via the separate product structure DKX001</li> </ul> </li> <li>▪ If ordered subsequently: DKX001: Via the separate product structure DKX001</li> </ul> <p><b>Mounting bracket for DKX001</b></p> <ul style="list-style-type: none"> <li>▪ If ordered directly: order code for "Accessory enclosed", option RA "Mounting bracket, pipe 1/2"</li> <li>▪ If ordered subsequently: order number: 71340960</li> </ul> <p><b>Connecting cable (replacement cable)</b> Via the separate product structure: DKX002</p> <p> Further information on display and operating module DKX001 →  95.</p> <p> Special Documentation SD01763D</p>
<p>External WLAN antenna</p>	<p>External WLAN antenna with 1.5 m (59.1 in) connecting cable and two angle brackets. Order code for "Accessory enclosed", option P8 "Wireless antenna wide area".</p> <p> <ul style="list-style-type: none"> <li>▪ The external WLAN antenna is not suitable for use in hygienic applications.</li> <li>▪ Further information on the WLAN interface →  102.</li> </ul></p> <p> Order number: 71351317</p> <p> Installation Instructions EA01238D</p>
<p>Protective cover</p>	<p>Is used to protect the measuring instrument from the effects of the weather: e.g. rainwater, excess heating from direct sunlight.</p> <p> Order number: 71343505</p> <p> Installation Instructions EA01160D</p>

**For the sensor**

Accessories	Description
<p>Heating jacket</p>	<p>Is used to stabilize the temperature of the fluids in the sensor. Water, water vapor and other non-corrosive liquids are permitted for use as fluids.</p> <p> If using oil as a heating medium, please consult with Endress+Hauser.</p> <p>Use the order code with the product root DK8003.</p> <p> Special Documentation SD02161D</p>

**Communication-specific accessories**

Accessories	Description
<p>Commubox FXA195 HART</p>	<p>For intrinsically safe HART communication with FieldCare via the USB interface.</p> <p> Technical Information TI00404F</p>
<p>HART loop converter HMX50</p>	<p>Is used to evaluate and convert dynamic HART process variables to analog current signals or limit values.</p> <p> <ul style="list-style-type: none"> <li>▪ Technical Information TI00429F</li> <li>▪ Operating Instructions BA00371F</li> </ul></p>
<p>Fieldgate FXA42</p>	<p>Transmission of the measured values of connected 4 to 20 mA analog measuring instruments, as well as digital measuring instruments</p> <p> <ul style="list-style-type: none"> <li>▪ Technical Information TI01297S</li> <li>▪ Operating Instructions BA01778S</li> <li>▪ Product page: <a href="http://www.endress.com/fxa42">www.endress.com/fxa42</a></li> </ul></p>

Field Xpert SMT50	<p>The Field Xpert SMT50 tablet PC for device configuration enables mobile plant asset management in non-hazardous areas. It is suitable for commissioning and maintenance staff to manage field instruments with a digital communication interface and to record progress.</p> <p>This tablet PC is designed as an all-in-one solution with a preinstalled driver library and is an easy-to-use, touch-sensitive tool which can be used to manage field instruments throughout their entire life cycle.</p>  <ul style="list-style-type: none"> <li>▪ Technical Information TI01555S</li> <li>▪ Operating Instructions BA02053S</li> <li>▪ Product page: <a href="http://www.endress.com/smt50">www.endress.com/smt50</a></li> </ul>
Field Xpert SMT70	<p>The Field Xpert SMT70 tablet PC for device configuration enables mobile plant asset management in hazardous and non-hazardous areas. It is suitable for commissioning and maintenance staff to manage field instruments with a digital communication interface and to record progress.</p> <p>This tablet PC is designed as an all-in-one solution with a preinstalled driver library and is an easy-to-use, touch-sensitive tool which can be used to manage field instruments throughout their entire life cycle.</p>  <ul style="list-style-type: none"> <li>▪ Technical Information TI01342S</li> <li>▪ Operating Instructions BA01709S</li> <li>▪ Product page: <a href="http://www.endress.com/smt70">www.endress.com/smt70</a></li> </ul>
Field Xpert SMT77	<p>The Field Xpert SMT77 tablet PC for device configuration enables mobile plant asset management in areas categorized as Ex Zone 1.</p>  <ul style="list-style-type: none"> <li>▪ Technical Information TI01418S</li> <li>▪ Operating Instructions BA01923S</li> <li>▪ Product page: <a href="http://www.endress.com/smt77">www.endress.com/smt77</a></li> </ul>

## Service-specific accessories

Accessory	Description
Applicator	<p>Software for selecting and sizing Endress+Hauser measuring instruments:</p> <ul style="list-style-type: none"> <li>▪ Choice of measuring instruments for industrial requirements</li> <li>▪ Calculation of all the necessary data for identifying the optimum flowmeter: e.g. nominal diameter, pressure loss, flow velocity and measurement accuracy.</li> <li>▪ Graphic display of the calculation results</li> <li>▪ Determining the partial order code. Administration, documentation and access to all project-related data and parameters over the entire life cycle of a project.</li> </ul> <p>Applicator is available: Via the Internet: <a href="https://portal.endress.com/webapp/applicator">https://portal.endress.com/webapp/applicator</a></p>
Netilion	<p>IIoT ecosystem: Unlock knowledge</p> <p>With the Netilion IIoT ecosystem, Endress+Hauser allows you to optimize your plant performance, digitize workflows, share knowledge, and enhance collaboration.</p> <p>Based on decades of experience in process automation, Endress+Hauser offers the process industry an IIoT ecosystem that enables you to gain useful insights from data. These insights can be used to optimize processes, leading to increased plant availability, efficiency, and reliability - ultimately resulting in a more profitable plant.</p> <p><a href="http://www.netilion.endress.com">www.netilion.endress.com</a></p>
FieldCare	<p>FDT-based plant asset management tool from Endress+Hauser.</p> <p>It can configure all intelligent field units in your system and helps you manage them. By using the status information, it is also a simple but effective way of checking their status and condition.</p>  <ul style="list-style-type: none"> <li>▪ Operating Instructions BA00027S and BA00059S</li> </ul>
DeviceCare	<p>Tool to connect and configure Endress+Hauser field devices.</p>  <ul style="list-style-type: none"> <li>▪ Technical Information: TI01134S</li> <li>▪ Innovation brochure: INO1047S</li> </ul>

System components	Accessories	Description
	Memograph M graphic data manager	The Memograph M graphic data manager provides information on all the relevant measured variables. Measured values are recorded correctly, limit values are monitored and measuring points analyzed. The data are stored in the 256 MB internal memory and also on a SD card or USB stick.  <ul style="list-style-type: none"> <li>Technical Information TI00133R</li> <li>Operating Instructions BA00247R</li> </ul>
	Cerabar M	The pressure transmitter for measuring the absolute and gauge pressure of gases, steam and liquids. It can be used to read in the operating pressure value.  <ul style="list-style-type: none"> <li>Technical Information TI00426P and TI00436P</li> <li>Operating Instructions BA00200P and BA00382P</li> </ul>
	Cerabar S	The pressure transmitter for measuring the absolute and gauge pressure of gases, steam and liquids. It can be used to read in the operating pressure value.  <ul style="list-style-type: none"> <li>Technical Information TI00383P</li> <li>Operating Instructions BA00271P</li> </ul>
	iTEMP	The temperature transmitters can be used in all applications and are suitable for the measurement of gases, steam and liquids. They can be used to read in the medium temperature.  "Fields of Activity" document FA00006T

## Documentation

-  For an overview of the scope of the associated Technical Documentation, refer to the following:
- Device Viewer ([www.endress.com/deviceviewer](http://www.endress.com/deviceviewer)): Enter the serial number from the nameplate
  - Endress+Hauser Operations app: Enter serial number from nameplate or scan matrix code on nameplate.

### Standard documentation

-  Supplementary information on the semi-standard options is available in the relevant Special Documentation in the TSP database.

### Brief Operating Instructions

#### Brief Operating Instructions for the sensor

Measuring instrument	Documentation code
Proline Promass Q	KA01262D

#### Brief Operating Instructions for the transmitter

Measuring instrument	Documentation code				
	HART	FOUNDATION Fieldbus	PROFIBUS PA	PROFIBUS DP	Modbus RS485
Proline 300	KA01309D	KA01229D	KA01227D	KA01386D	KA01311D

#### Brief Operating Instructions for the transmitter
